

Design Suggestions

Program-level token decisions · Frame-level fixes · No-design screen proposals

These are design-team recommendations — not dev defects. Each item is written so it can be actioned directly in Figma or @mosje/tokens. Dev-fixable fidelity issues are in the separate Design QC Report.

GENERATED	PORTAL	TOTAL ITEMS	STATUS
2026-06-10	eUtthan Admin (UAT)	10 suggestions across 3 categories	All items: Proposed

ALL ITEMS

DS-PRG-001	Resolve brand-primary token conflict	Critical
DS-PRG-002	Tokenise the neutral grey ramp	High
DS-PRG-003	Add missing brand tokens: Gov-Yellow + Nav-Active surface	High
DS-PRG-004	Publish an explicit radius scale	Medium
DS-ADMIN-001	Masthead: 'Ministry' vs 'Department' label	High
DS-ADMIN-002	Sidebar navigation is now eUtthan-specific (no further action on nav IA)	Low
DS-ADMIN-010	Login / Authentication screen	High
DS-ADMIN-011	Role Management	Medium
DS-ADMIN-012	PFMS Logs	Medium
DS-ADMIN-013	Reports — Financial Summary	Medium

Program-Level Design Decisions

Token and system decisions that affect all portals, not just eUtthan.

4 items

DS-PRG-001 Resolve brand-primary token conflict Critical		
CONTEXT The DS library and live portal use #003366 (navy) as brand primary. CLAUDE.md documents gov-blue as #0373DF. These conflict on every primary surface.	CURRENT #0373DF in CLAUDE.md / @mosje/tokens PROPOSED #003366 as canonical Primary/Source — matches DS Figma library, handoff frames, and live builds across all portals	RATIONALE Pick one canonical value. #003366 is already in use in Figma + live; changing to #0373DF requires updating every portal build. ACTION Update @mosje/tokens Primary/Source → #003366. Update CLAUDE.md. Communicate to all portal teams.
FIGMA REF: All frames — Primary button, header, sidebar active state		
DS-PRG-002 Tokenise the neutral grey ramp High		
CONTEXT DS defines only Neutral/Source #374151 + white. Builds reach for Tailwind greys (#4b5563, #6b7280, #9ca3af, #1f2937, border #e2e8f0, surface #f8fafc) — un-tokenised on every screen.	CURRENT No neutral ramp in DS library PROPOSED Neutral 50–900 ramp (e.g. 50:#F8FAFC, 100:#F1F5F9, 200:#E2E8F0, 300:#CBD5E1, 400:#94A3B8, 500:#64748B, 600:#475569, 700:#334155, 800:#1E293B, 900:#0F172A)	RATIONALE Body text, muted text, borders, surface backgrounds — all currently uncontrolled. Any grey on any portal is a design debt item. ACTION Add Neutral ramp to DS Figma Variables + @mosje/tokens. Dev maps Tailwind shades to DS tokens.
FIGMA REF: All table borders, surface backgrounds, body text		
DS-PRG-003 Add missing brand tokens: Gov-Yellow + Nav-Active surface High		
CONTEXT #FFD323 (BETA badge, gov-yellow) and #E5EFF9 (sidebar active nav surface) are used consistently across all eUtthan screens but absent from the DS token set.	CURRENT Hardcoded hex values in components PROPOSED Accent/Gov-Yellow: #FFD323 · Surface/Nav-Active: #E5EFF9 (or Primary/50 derived)	RATIONALE Two of the most-used colours in the portal aren't governed. Nav-Active is on every page in the sidebar. ACTION Add both to DS Figma Variables. Add to @mosje/tokens. Dev replaces hardcoded values.
FIGMA REF: BETA badge (Dashboard masthead), sidebar active item (every screen)		

CONTEXT

DS defines button-corner 8px only. The portal build uses 4 / 6 / 8 / 12 / 14px across different components with no system.

CURRENT

Only radius-button: 8px in DS

PROPOSED

xs: 4px · sm: 6px · md: 8px · lg: 12px · xl: 14px — mapped as DS corner-* tokens

RATIONALE

Without a radius scale, each component team picks arbitrarily. Cards, inputs, buttons, badges all diverge.

ACTION

Define and publish radius scale in DS. Update all component corner specs. Enforce via design linter.

FIGMA REF: Cards (Dashboard), inputs (all forms), badges (table rows)

Existing Frame Design Fixes

Issues in the Figma handoff frames that should be corrected before dev reference.

2 items

DS-ADMIN-001 Masthead: 'Ministry' vs 'Department' label High		
CONTEXT Figma reads 'Department of Social Justice & Empowerment' on the bold masthead line. Live build reads 'Ministry of Social Justice & Empowerment'. The correct legal entity name should be confirmed.	CURRENT Figma: 'Department of Social Justice & Empowerment' PROPOSED Confirm correct entity name with stakeholders. Likely 'Ministry of Social Justice & Empowerment' (matches live + official communications). Update Figma across all frames.	RATIONALE Design and build disagreeing on a mandatory government branding element is a compliance risk. ACTION Get stakeholder sign-off → update Figma masthead text across all frames (one master component).
FIGMA REF: Frame 4226:39685 (Dashboard) — masthead component used on every screen		
DS-ADMIN-002 Sidebar navigation is now eUtthan-specific (no further action on nav IA) Low		
CONTEXT Previous Figma version showed a generic multi-scheme MoSJE nav. Fresh frames (June 2026) now show the correct eUtthan-specific nav: Financial Year, Ministry, Scheme, Outcome, Documents, Map, Reports, User Management, Role Management, PFMS Logs.	CURRENT RESOLVED in latest Figma frames PROPOSED No action needed. Nav IA matches live. Document for record.	RATIONALE Fresh frames confirm the sidebar was updated correctly. ACTION None. Close.
FIGMA REF: All frames — sidebar nav component		

No-Design Screens — DS-Based Proposals

Screens that exist in the live build but have no Figma design. Each proposal uses DS components and the established eUtthan visual language.

4 items

DS-ADMIN-010 Login / Authentication screen			High
CONTEXT No Figma design exists for the login page. The live build has a split-panel layout (logo left, form right) but lacks the mandatory GIGW govbar and has sub-spec form components.	CURRENT Live: split panel, no govbar, 41px button, no input labels PROPOSED Full-page with govbar → below: left panel (gov-blue #003366 bg, Ashoka emblem + SAMAVESH logo + tagline) → right panel (white, DS form with mobile + password inputs, MeriPehchaan SSO option, CAPTCHA). Both panels full viewport height.	RATIONALE Login is the first screen every user sees. Missing govbar is a GIGW compliance failure. Design should reinforce the government brand. ACTION Design new Login frame in Figma using DS Input, DS Button-primary, DS Card components. Include: govbar, masthead, two-panel layout, error states, forgot-password link.	
FIGMA REF: To be created — Login/Signup page (existing page 0:1 in Figma file)			
DS-ADMIN-011 Role Management			Medium
CONTEXT No Figma design. Live page lists roles with permissions matrix.	CURRENT Live: basic table listing roles × permissions PROPOSED Use DS Table + DS Badge (role type) + DS Toggle (permission enable/disable). Add top toolbar: Add Role, search. Permission matrix view as secondary tab.	RATIONALE Admin-facing screens still need design specifications for consistent implementation. ACTION Create Role Management Figma frame using DS Table + DS Permission Matrix pattern.	
FIGMA REF: To be created			
DS-ADMIN-012 PFMS Logs			Medium
CONTEXT No Figma design. Live page shows payment/transaction logs.	CURRENT Live: table with transaction records, date filters PROPOSED DS Table with date range picker, status filter pills, export button. Log rows: timestamp mono font, status badge (success/error/pending), amount right-aligned.	RATIONALE Financial log view needs clear visual hierarchy for quick scanning. ACTION Create PFMS Logs Figma frame using DS Table + DS DateRangePicker + DS StatusBadge.	
FIGMA REF: To be created			

CONTEXT No Figma design. Live page shows financial summary report with charts.	CURRENT Live: data-heavy page with charts and tables PROPOSED Report layout: summary metrics row (DS Stat cards) → bar chart → detailed breakdown table with export to Excel/PDF. Print-optimised layout variant.	RATIONALE Reports need consistent layout and printable version. ACTION Create Financial Summary + Statement 10A Figma frames. Include print variant.
