

A — Program-level token decisions

1

Brand-primary token conflict — #003366 vs #0373DF

Decide

DS-PRG-001

OBSERVED

The design library, the Handoff frames and the live portal all use navy #003366 as the brand primary, but the workspace token documentation lists gov-blue #0373DF. Until one is chosen, every primary surface across the portals is ambiguous.

RECOMMENDATION

Adopt #003366 as the single canonical Primary (it matches the design library, the Handoff file and the live build) and update the token documentation and @mosje/tokens. If #0373DF is actually intended, reverse the decision — but pick one now.

2

Neutral grey ramp is missing from the design system

Decide

DS-PRG-002

OBSERVED

The library defines only Neutral #374151 plus white. The build needs greys for muted text, borders and surfaces, so developers reached for un-governed values (#4b5563, #6b7280, #9ca3af, #112937, #e2e8f0, #f8fafc) on every screen.

RECOMMENDATION

Add a tokenised neutral ramp (Neutral 50–900) to the design system and Figma variables so the build can map every grey to a token.

3

Missing brand tokens: gov-yellow & active-nav surface

Decide

DS-PRG-003

OBSERVED

#FFD323 (the BETA badge yellow) and #E5EFF9 (the sidebar active-item surface used consistently on every screen) are not tokens in the library.

RECOMMENDATION

Add Accent/Gov-Yellow #FFD323 and Surface/Nav-Active #E5EFF9 (or derive it from Primary/100) so these consistent usages are governed.

4

Define a radius scale

Decide

DS-PRG-004

OBSERVED

The library defines a single radius token (button-corner 8). The build and the designs use 4, 6, 8, 12 and 14px corners in different places.

RECOMMENDATION

Publish an explicit radius scale (e.g. xs 4 / sm 8 / md 12 / lg 14) so component corners are intentional and consistent on both sides.

B — Updates to existing Figma frames

5

Masthead headline: 'Department' vs 'Ministry'

Design

DS-ADMIN-001

DESIGN — current Figma

LIVE — current build

OBSERVED

The Figma masthead reads 'Department of Social Justice & Empowerment' as the bold headline; the live portal reads 'Ministry of Social Justice & Empowerment'. One of them is the wrong entity name — the dev report asks the build to match the design, but the design itself should be confirmed first.

RECOMMENDATION

Confirm the correct entity name with stakeholders and update the Figma masthead accordingly, so design and build can converge on the right name.

6

Sidebar navigation in Figma is a generic template

Design

DS-ADMIN-002

DESIGN — current Figma

LIVE — current build

OBSERVED

Several design frames show a generic multi-scheme MoSJE navigation, while the live eUtthan portal has its own specific menu (Manage Financial Year / Ministry / Scheme / Outcome / Documents, Map Ministry/Schemes, User & Role Management, PFMS Logs, Reports).

RECOMMENDATION

Update the Figma sidebar to the actual eUtthan navigation so the design file reflects the shipped product (or confirm the generic nav is intentional shell scaffolding).

7

Design an empty state for data tables

Design

DS-ADMIN-003

LIVE — current build

OBSERVED

When a table has no rows, the build shows a bare 'No Data Found' line. No empty state exists in the design file, so the build improvised.

RECOMMENDATION

Design a reusable table empty-state (illustration or icon, short message, and the primary action e.g. '+ Add Scheme') and add it to the design system.

C — Screens built live with no design (proposals needed)

8

Role Management — built, never designed

Propose

DS-ADMIN-011

LIVE — current build

OBSERVED

The screen exists live (role list with permissions) but has no Figma frame.

RECOMMENDATION

Create the Figma frame using the eUtthan visual language (navy #003366, Noto Sans, the standard table card and toolbar patterns).

9

PFMS Logs — built, never designed

Propose

DS-ADMIN-012

LIVE — current build

OBSERVED

The PFMS Logs screen exists live but has no Figma frame.

RECOMMENDATION

Create the Figma frame following the standard list/table pattern; include the log-status chips in DS colours.

10

Reports · Financial Summary — built, never designed

Propose

DS-ADMIN-013

LIVE — current build

OBSERVED

The Financial Summary report exists live but has no Figma frame.

RECOMMENDATION

Create the Figma frame (filters row + summary table) using the DS table and chip components.

11

Reports · Statement 10A — built, never designed

Propose

DS-ADMIN-014

LIVE — current build

OBSERVED

The Statement 10A report exists live but has no Figma frame.

RECOMMENDATION

Create the Figma frame using the DS report-table pattern, consistent with the Financial Summary proposal.
