Version History

Version	Date	Author	Remarks
1.0	May 2026	Rohit Kumar	Initial Draft — Mobile Application BRD

Document Purpose

This document is the consolidated Business Requirement Document (BRD) for the SMILE — Beggary Survey programme. It specifies the requirements for both the field-level Mobile Application and the Backend Admin Panel (web portal) used by all programme stakeholders. The document is intended to serve as the single source of truth for the design, development, testing, and acceptance of the system.

Common Dashboard Behaviours (all four roles)	56
Quick Comparison — Scope at a Glance	56
21. Glossary / Key Abbreviations	57

1. Introduction

1.1 Purpose

This Business Requirement Document (BRD) formally captures, documents, and validates the business requirements for the SMILE — Beggary Survey system, comprising both a field-level Mobile Application and a Backend Admin Panel (web portal). The system is designed to digitise the end-to-end lifecycle of the SMILE Scheme — from on-ground beneficiary identification through Survey, to mobilisation, rehabilitation, fund management, and programme-level monitoring.

This document serves as a single source of truth to:

- Define the scope, features, and capabilities of both the mobile application and the web-based admin panel.
- Establish role-based feature ownership across all eight stakeholder categories — SuperAdmin, Central Admin / Central Ministry, State Nodal Officer, Implementing Authority/Nodal Officer (N.O.) Officer, Implementing Agency, Surveyor, Under Secretary / Section Officer (US/SO), and NISD.
- Capture the workflow whereby the Implementing Authority/Nodal Officer (N.O.) Officer creates and assigns surveys to Implementing Agencies, who in turn map surveyors to those surveys.
- Specify the Fund Management workflow involving NISD, US/SO, and the Implementing Authority/Nodal Officer (N.O.) Officer with Implementing Agency as the downstream utilisation actor.
- Specify the Comprehensive Rehabilitation tracking module covering skill & training and post-rehabilitation follow-up data per beneficiary.

1.2 Background

The SMILE — Beggary Scheme, implemented by the Ministry of Social Justice and Empowerment (MoSJE), aims to support the identification, rehabilitation, and reintegration of persons engaged in beggary. This consolidated BRD operationalises the digital ecosystem by specifying field-level (mobile) and back-office (web admin panel) requirements for every stakeholder, including the fund-management actors (NISD, US/SO) and the Implementing Authority/Nodal Officer (N.O.)

1.3 Vision / Target State

To deliver an integrated, secure, English-Hindi Support, and offline-capable digital platform that enables accurate, geo-tagged, transparent, role-based programme governance through a unified admin panel, auditable fund flow from NISD through US/SO and the Implementing Authority/Nodal Officer (N.O.) Officer to the Implementing Agencies, and end-to-end traceability of every beneficiary's rehabilitation journey from identification through three-month follow-up.

1.4 Document Scope

This BRD covers:

- Mobile Application requirements — for Implementing Agency and Surveyor roles, including authentication, IA self-registration, dashboards, surveyor mapping, beneficiary data capture, status updates, and review workflows.
- Backend Admin Panel requirements — covering eight stakeholder modules and a dedicated Fund Management workflow.
- Cross-cutting requirements — non-functional, business rules, workflows, integrations, the field-level survey questionnaire, and the comprehensive rehabilitation data format.

2. Objectives

2.1 Business Objectives

- Digitise field-level survey operations and eliminate paper-based collection.
- Centralise survey creation and territorial assignment at the Implementing Authority/Nodal Officer (N.O.) level.
- Ensure survey authenticity through mandatory geo-tagging and live photograph capture.
- Improve accessibility and adoption through Hindi language support via BHASHINI.
- Establish a transparent, auditable fund-flow trail from NISD through US/SO and Implementing Authority/Nodal Officer (N.O.) Officer to Implementing Agencies.
- Track every beneficiary's complete rehabilitation lifecycle, including skill & training and three-month follow-up status.
- Provide programme-level performance visibility (state-wise and district-wise) to Central Admin and senior decision-makers.

2.2 Functional Objectives

- Implement OTP-based registration and authentication for IAs and Surveyors on the mobile app.
- Implement role-based login (RBAC) for all admin-panel stakeholders on the web portal.
- Enable IA self-registration on the mobile app with capture of institute type, Darpan ID, and work order / MoU upload.
- Enable Implementing Authority/Nodal Officer (N.O.) Officer to create survey locations and assign them to Implementing Agencies.
- Provide Implementing Agencies with both mobile and web access — mobile for surveyor mapping, review, status updates, and clarification handling; web for fund-utilisation reporting.
- Capture a live photograph of the beneficiary (camera-only, no gallery upload, no face authentication engine).
- Capture beneficiary informed consent through a mandatory checkbox (no audio recording).
- Render the Revised Survey Questionnaire (Adult and CNCP) in English and Hindi using BHASHINI translation services.
- Provide a Fund Management module with editable access for US/SO, NISD, and Implementing Authority/Nodal Officer (N.O.) Officer, and view-only access for Super Admin and Central Admin.

- Provide a Comprehensive Rehabilitation tracking module covering skill & training and full rehabilitation data including wage employment, self-employment, government-scheme convergence, and three-month follow-up.
- Provide a comprehensive MIS reporting suite covering beneficiaries, mobilisation, rehabilitation, shelter homes, IAs, and survey locations.

2.3 Technical Objectives

- Develop a native Android application compatible with Android 8.0 (Oreo) and above.
- Develop a responsive web admin panel accessible on modern browsers (Chrome, Edge, Firefox, Safari).
- Integrate with centralised SMILE backend APIs for sync, survey assignment retrieval, and routing.
- Integrate with BHASHINI APIs for English to Hindi translation.
- Implement secure local database (SQLite/Room) for offline mobile data persistence with encryption.
- Implement Role-Based Access Control (RBAC) at API and UI level for all admin-panel modules.

2.4 UI/UX Objectives

- Provide a language toggle (English / हिन्दी) on the mobile application.
- Keep the IA mobile home screen minimal — focused on assigned survey locations, surveyor onboarding, and review actions.
- Provide a clean, role-aware admin panel where each user sees only the menus and actions permitted by their role and territorial scope.
- Provide consistent search, filter, and CSV/PDF download capabilities across all admin-panel listing screens.

2.5 Reporting & Analytics Objectives

- Surveyor mobile dashboard: Total Conducted Surveys, Pending Surveys, Returned Seeking Clarification, Approved Beneficiary Data.
- IA mobile dashboard: assigned survey locations, surveyors mapped, submission status, clarifications raised.
- Super Admin dashboard: system-wide statistics — users, surveys, beneficiaries, IAs, funds released, funds utilised, rehabilitation outcomes.
- State and district-level performance statistics with appropriate scope filters per role.
- Downloadable MIS reports in CSV and PDF format from every relevant listing screen.

3. Scope of Work

3.1 In-Scope

3.1.1 Mobile Application

- OTP-based registration and login for Implementing Agencies and Surveyors.
- IA self-registration with capture of Institute Type, Organisation Name, Person Name, Mobile Number, Address, State, District/City, Pincode, Designation, Darpan ID, Work Order / MoU upload, and IA Branch.
- Retrieval of survey locations created and assigned by the Implementing Authority/Nodal Officer (N.O.) Officer from the web portal.
- IA dashboard — view assigned survey locations, onboard multiple surveyors, review submissions, accept or raise clarifications, change beneficiary status (Under Mobilisation / Mobilised), assign shelter homes, update skill & training status.
- Surveyor dashboard — visualisation tiles for Total Conducted Surveys, Pending Surveys, Returned Seeking Clarification, Approved Beneficiary Data; survey initiation; data capture; mobilisation status update post-survey.
- Digital beneficiary data capture using the Revised SMILE Survey Questionnaire (Adult and CNCP).
- Live photograph capture (camera-only); no face authentication engine.
- Checkbox-based informed consent capture; no audio recording.
- BHASHINI integration for English and Hindi rendering of the questionnaire.
- Mandatory GPS geo-location tagging for every survey session.
- Offline data capture with encrypted local storage and auto-synchronisation.
- Surveyor e-signature capture at survey submission.
- Sidebar (hamburger) menus on both IA and Surveyor mobile apps with profile, version, and logout.

3.1.2 Backend Admin Panel (Web Portal)

- Role-based access for SuperAdmin, Central Admin / Central Ministry, State Nodal Officer, Implementing Authority/Nodal Officer (N.O.), US/SO, and NISD.
- User management, role/permission management, and master-data configuration.
- Survey creation and assignment (Implementing Authority/Nodal Officer (N.O.) Officer) and end-to-end survey monitoring (all higher roles).
- Beneficiary management — listing, mobilisation tracking, shelter-home tracking, rehabilitation tracking.
- Beggary Scheme management — agency/IA registration approvals, scheme list and routing.
- Fund Management module — editable for US/SO, NISD, and Implementing Authority/Nodal Officer (N.O.) Officer; view-only for Super Admin and Central Admin / Central Ministry.
- Comprehensive Rehabilitation module — Skill & Training tracker and full rehabilitation data tracker (per the SMILE Rehabilitation Data Format).
- MIS Reports — Mobilised, Rehabilitated, Beneficiary, Shelter Home, IA/Agency/Institute, Survey Location.
- Performance statistics — state-wise and district/city-wise dashboards.
- Notification centre for system-generated and broadcast notifications.

3.2 Out-of-Scope

- Face authentication / duplicate detection engine.
- Audio consent recording.
- Direct payment processing or banking integration on the admin panel — fund disbursement is recorded as a transactional entry; actual disbursement happens through existing PFMS / Government banking channels and is referenced by sanction order / UTR number.
- iOS application development (initial release targeted for Android only).

4. Stakeholders

The SMILE — Beggary Survey system is operated by nine distinct stakeholder roles. The table below summarises each role, the primary channel through which the role accesses the system, and the role's core responsibilities.

Stakeholder	Channel	Role / Responsibility
SuperAdmin	Web Portal	Owns the platform. Manages all users, roles, permissions, masters, system-wide configurations. Has full visibility (view) across every module — including Fund Monitoring and Comprehensive Rehabilitation — for every state and district.
Central Admin / Central Ministry	Web Portal	Represents MoSJE / NeGD at the central level. Reviews national-level performance, monitors all states, oversees scheme execution, has view access to Fund Monitoring (read-only) and all programme modules. Acts as the central approval/oversight authority for cross-state actions.
State Nodal Officer	Web Portal	Owns the SMILE programme at the State / UT level. Has access to the same set of programme sub-modules as the SuperAdmin but scoped to data within the State. Coordinates districts under the state, monitors state-wise performance, and serves as the escalation authority within the state.
Implementing Authority/Nodal Officer (N.O.) Officer	Web Portal	Has access to the same set of programme sub-modules as the SuperAdmin but scoped to data within the District. Creates survey locations, assigns them to IAs, approves IA registrations, reviews records forwarded by IAs. Also acts as a Fund Management stakeholder (editable) — records funds received from NISD and the onward release to IAs / NGOs.
Implementing Agency (IA)	Mobile App	Mobile App: Self-registers via OTP. Receives surveys assigned by the Implementing Authority/Nodal Officer (N.O.). Maps surveyors to assigned surveys. Reviews submitted records and forwards to Implementing Authority/Nodal Officer (N.O.) Officer or raises clarifications. Updates beneficiary mobilisation status. Assigns shelter homes. Updates skill & training status.

Stakeholder	Channel	Role / Responsibility
Surveyor	Mobile App	Logs in via OTP. Conducts field surveys for surveys mapped by the IA. Captures Aadhaar, live photograph, consent (checkbox), geo-location, and submits beneficiary records. Updates mobilisation status of beneficiary post-survey.
Under Secretary / Section Officer (US/SO)	Web Portal — Fund Management only	Operates the Fund Management module (editable). Records sanction-order amount, sanction date, installment, phase, district, and uploads sanction order. Tracks release status. Has no access to other programme sub-modules.
NISD (National Institute of Social Defence)	Web Portal — Fund Management only	Operates the Fund Management module (editable). Records funds received and the corresponding release to the State / UT — with installment number, installment amount, and release date. Has no access to other programme sub-modules.
Beneficiary	In-person	Provides consent and information during the survey. Not a system user.
Shelter Home	Web Portal	Operates a registered shelter home. Logs in to view beneficiaries assigned to the shelter by the IA. Updates the beggar-condition profile of each beneficiary. Updates the skill / vocational training assigned to each beneficiary at the shelter. Updates the shelter home's facilities profile (the master inventory of what the shelter offers). Account is created either by the IA (and approved by the DA / Nodal Officer) or directly by the DA / Nodal Officer (auto-approved).

5. System Architecture Overview

The SMILE — Beggary Survey system is composed of two principal client surfaces backed by a unified backend:

- Mobile Application (Android) — used by Implementing Agencies and Surveyors for field data capture.
- Web Admin Panel — used by SuperAdmin, Central Admin / Central Ministry, State Nodal Officer, Implementing Authority/Nodal Officer (N.O.) Officer, US/SO, and NISD.

Both surfaces communicate with a common backend service layer that exposes RESTful APIs, integrates with external Government services (BHASHINI, SMS/OTP gateway, FCM), and persists data in a centralised, encrypted data store. Role-Based Access Control (RBAC) and territorial-scope filtering are enforced at the API gateway and re-enforced at the UI layer.

Layer	Component	Description
Client	Android App	Native Android, offline-capable, BHASHINI-integrated for questionnaire, used by IA and Surveyor.
Client	Web Admin Panel	Responsive web application; role-aware navigation and screens.

Layer	Component	Description
API Gateway	RBAC + Auth + Scope	Validates tokens, enforces role/permission checks, applies territorial scope filters (state, district, agency).
Service Layer	Microservices	User Mgmt, Survey, Beneficiary, Fund Mgmt, Comprehensive Rehab, Reports, Notification, Master Data.
Integration	External APIs	BHASHINI, SMS/OTP Gateway, FCM
Data Layer	RDBMS + Object Store	Encrypted relational DB; object store for images, sanction-order PDFs, MoU/work-order PDFs, supporting documents.

6. Mobile Application — Functional Requirements

The functional requirements in this section apply to the Android mobile application and are owned by the Implementing Agency and Surveyor stakeholder roles.

6.1 Authentication (OTP-Based Login)

Both Implementing Agencies and Surveyors authenticate to the mobile application using their registered mobile number and a One-Time Password (OTP) delivered via SMS.

FR-AUTH-001: Mobile-Number-Based Login

The system shall allow IA and Surveyor users to log in using their registered mobile number; an OTP shall be sent to the registered number for verification.

FR-AUTH-002: OTP Validity

OTP shall be valid for 5 minutes; a maximum of 3 incorrect attempts are allowed before the OTP is invalidated and a new OTP must be requested.

FR-AUTH-003: Resend OTP

Resend OTP shall be available after a 30-second cool-down.

FR-AUTH-004: Session Token

On successful authentication the system shall issue a session token used for subsequent API calls; idle session timeout shall be configurable in Master Settings.

6.2 IA Self-Registration

An Implementing Agency intending to participate in the SMILE Scheme can self-register through the mobile application. Registration is subject to approval by the Implementing Authority/Nodal Officer (N.O.) Officer on the web portal before the IA account is activated.

6.2.1 IA Registration — Form Fields

Table — IA Registration form fields:

#	Field	Type	Mandatory	Description / Validation
1	Institute Type	Single-Select Dropdown	Yes	Populated from the master (NGO, Section 8 Company, Trust, Society, Government Institution, Other).
2	Organisation Name	Text	Yes	Registered name of the agency. Min 3, max 200 characters.
3	Person Name	Text	Yes	Name of the authorised representative submitting the registration.

#	Field	Type	Mandatory	Description / Validation
4	Mobile Number	Numeric	Yes	10-digit mobile number of the representative; OTP delivered to this number; must be unique across active accounts.
5	Address	Text Area	Yes	Full registered address, max 500 characters.
6	State	Single-Select Dropdown	Yes	Populated from the State master.
7	District / City	Single-Select Dropdown	Yes	Dependent on selected State; populated from the District master.
8	Pincode	Numeric	Yes	6-digit Indian pincode.
9	Designation	Text	Yes	Designation of the authorised representative.
10	Darpan ID	Text	Yes	NGO Darpan unique identifier issued by NITI Aayog. Validated offline at the time of verification by Implementing Authority/Nodal Officer(N.O.)
11	Work Order / MoU Upload	File Upload	Yes	PDF upload of the work order or MoU under which the IA proposes to operate. Max file size 10 MB. Visible to Central Admin, SuperAdmin. Implementing Authority/Nodal Officer (N.O.) Officer for verification.
12	IA Branch	Text / Single-Select	Optional	If the IA operates branches, the specific branch under which this registration applies.

6.2.2 IA Registration — Workflow

- Step 1 — IA opens the app and selects 'Register'.
- Step 2 — IA fills in the registration form and uploads the work order / MoU.
- Step 3 — IA fills the registered mobile number which will be used for login with OTP.
- Step 4 — On successful submission, the registration is routed to the Implementing Authority/Nodal Officer (N.O.) Officer of the selected District for approval. The IA account is in 'Pending Approval' state until approved.
- Step 5 — On approval, the IA receives an activation notification (SMS + push); the IA can now log in and access the dashboard.
- Step 6 — On rejection or clarification, the IA receives the reason via SMS and can re-submit.

Document Visibility — Visibility of the uploaded work order / MoU is restricted to MoSJE / Central Ministry, SuperAdmin, and the Implementing Authority/Nodal Officer (N.O.) Officer of the relevant district. The IA can view their own uploaded copy from their profile screen.

6.3 IA Role — Mobile App Features

6.3.1 IA Dashboard

On successful login, the IA lands on the home screen. The IA dashboard provides a consolidated view of the IA's operational state and the primary actions the IA must perform.

IA Feature capabilities:

- View the survey locations assigned to the IA by the Implementing Authority/Nodal Officer (N.O.) Officer.
- Onboard multiple surveyors and map them to a survey location.
- Review beneficiary records submitted by the surveyors.
- Accept submitted records (which routes them to the Implementing Authority/Nodal Officer (N.O.) Officer) or raise a clarification (which routes the record back to the surveyor).
- Change the beneficiary status from 'Identified' to 'Under Mobilisation' and from 'Under Mobilisation' to 'Mobilised'.
- Assign a shelter home to a mobilised beneficiary (from the Shelter Home master).
- Update the skill & training status for a beneficiary (links to the Comprehensive Rehabilitation module on the admin panel).
- Raise a clarification with the Implementing Authority/Nodal Officer (N.O.) Officer if a survey location assigned to the surveyor is not completed within one month of assignment (auto-prompt).
- The IA can create Shelter Home users only for shelters mapped to that IA; the created user goes to 'Pending Approval' and routes to the Implementing Authority / Nodal Officer for Approval.

FR-IA-001: Survey Location View

The system shall display all survey locations currently assigned by the Implementing Authority/Nodal Officer (N.O.) Officer to the logged-in IA on the IA dashboard, with status (Open / Closed) and date of assignment.

FR-IA-002: Surveyor Mapping

The system shall allow the IA to onboard one or more surveyors and map them to a survey location, capturing the surveyor's Name, Mobile Number, Email ID, State and District.

FR-IA-003: Survey Review

The system shall display all beneficiary records submitted by surveyors mapped to the IA, in a reviewable list with sort and filter.

FR-IA-004: Accept / Raise Clarification

The IA shall be able to accept a submitted record (forwarding it to the Implementing Authority/Nodal Officer (N.O.) Officer) or raise a clarification with a free-text remark; clarifications are routed back to the originating surveyor.

FR-IA-005: Beneficiary Status Update

The IA shall be able to update the beneficiary status to 'Under Mobilisation' or 'Mobilised'. Status transitions are recorded with date, time, and the IA user who made the change.

FR-IA-006: Shelter Home Assignment

The IA shall be able to assign a shelter home to a mobilised beneficiary, selecting from the Shelter Home master scoped to the relevant district.

FR-IA-007: Skill & Training Status Update

The IA shall be able to update the skill & training status for a beneficiary; the captured data feeds the Comprehensive Rehabilitation — Skill and Training module (Section 8.11.1).

FR-IA-008: One-Month Completion Clarification

If a survey location assigned to a surveyor remains incomplete (no records submitted) for one calendar month from the date of assignment, the system shall (a) flag the location on the IA dashboard and (b) provide the IA a one-tap action to raise a clarification with the Implementing Authority/Nodal Officer (N.O.) Officer explaining the delay or requesting de-assignment.

6.3.2 IA Sidebar (Hamburger) Menu

The hamburger sidebar exposes the following menu options:

Menu Item	Behaviour
Profile	Displays IA profile — Name of Implementing Agency, Mobile Number, Email ID, Reporting Nodal Officer (the Implementing Authority/Nodal Officer (N.O.) Officer the IA reports to). Read-only on the mobile app
Notifications	List of in-app notifications received by the IA.
Language	Toggle between English and हिन्दी.
Version	App version number.
Logout	Clears session and returns to the login screen.

6.4 Surveyor Role — Mobile App Features

6.4.1 Surveyor Dashboard

The Surveyor dashboard is a visualisation-led screen that summarises the surveyor's activity and pending workload. Each tile is tappable and routes to the corresponding list.

Dashboard tiles:

#	Tile	Description
1	Total Conducted Survey	Total number of beneficiary records submitted by the surveyor (across all assigned locations).

#	Title	Description
2	Pending Survey	Number of survey locations assigned to the surveyor that have not yet reached the planned target / are still open.
3	Returned Seeking Clarification	Number of records returned to the surveyor by the IA or the Implementing Authority/Nodal Officer (N.O.) Officer with a clarification request.
4	Approved Beneficiary Data	Number of beneficiary records that have been accepted by both the IA and the Implementing Authority/Nodal Officer (N.O.) Officer.

Survey conduct flow:

- View the survey locations assigned to the surveyor.
- Initiate a survey at the selected location — the system captures geo-location and time stamp.
- Capture all beneficiary details per the Revised Survey Questionnaire (Adult / CNCP).
- Submit the record (online — routed to IA; offline — queued for auto-sync on reconnect).
- Update mobilisation status of the beneficiary post-survey (where the surveyor remains the primary point of contact for that beneficiary). For records the IA takes over, the IA performs subsequent status updates.

6.4.2 Surveyor Sidebar (Hamburger) Menu

The hamburger sidebar exposes the following menu options:

Menu Item	Behaviour
Pending Survey Location	Tappable — opens a list view of all pending survey locations assigned to the surveyor.
Pending Clarification	Tappable — opens a list of all clarifications raised on the surveyor's submissions by the IA or the Implementing Authority/Nodal Officer (N.O.) Officer; tap a row to view the clarification, edit the record, and resubmit.
Total Conducted Survey	Tappable — opens a list of all surveys completed by the surveyor, grouped by survey location.
Pending Approval	Tappable — opens a list of beneficiary records that the surveyor has submitted to the IA but that are still awaiting IA review.
Profile	Read-only profile — Name, Mobile Number, Email ID, Reporting Implementing Agency.
Language	Toggle between English and हिन्दी.
Version	App version number.
Logout	Clears session and returns to the login screen.

6.5 Beneficiary Data Capture

FR-CAP-001: Geo-Location Capture

The system shall auto-capture GPS coordinates at survey initiation and at each beneficiary submission and shall block survey start if GPS is disabled.

FR-CAP-002: Checkbox-Based Consent

The system shall capture beneficiary informed consent through a mandatory checkbox before any beneficiary data is recorded.

FR-CAP-004: Live Photograph Capture

The system shall capture a live photograph of the beneficiary using the device camera only. Gallery uploads shall be disabled. No face authentication or duplicate-detection engine shall be invoked.

FR-CAP-005: Questionnaire Rendering

The system shall render the Revised Survey Questionnaire (Adult and CNCP) with conditional fields, skip logic, repeating groups, and field-level validations.

FR-CAP-006: E-Signature & Submission

The system shall capture the surveyor's e-signature at survey submission.

6.6 BHASHINI English-Hindi Support

Language toggle (English / हिन्दी) on login and within forms; BHASHINI-driven translation of labels, instructions, validation messages, and option lists; cached translations for offline mode; language-neutral canonical storage of beneficiary responses.

6.7 Offline & Sync

Encrypted offline capture of all questionnaire data, photographs, and geo-tags; automatic synchronisation when connectivity is restored, with retry on failure (up to 3 retries with exponential backoff).

7. Backend Admin Panel — Overview & Module Access Matrix

The Backend Admin Panel is a web-based, role-aware portal that serves seven of the eight stakeholder roles in the SMILE — Beggary Survey system (the Surveyor role is mobile-only). The panel implements two layered access controls — (a) functional access (which sub-modules a role can see and act on) and (b) territorial scope (which data rows the role can see within those sub-modules).

7.1 Common Platform Capabilities

- Single Sign-On with role-based redirection to the appropriate landing dashboard.
- Role-Based Access Control (RBAC) enforced at both API and UI level.
- Territorial scope filters — State Nodal Officer sees only data within their state; Implementing Authority/Nodal Officer (N.O.) Officer sees only data within their district; IA-Web sees only data within their agency; SuperAdmin and Central Admin see everything.
- Tabular listing screens with sorting, pagination, search, and filter capabilities.

- Download of any listing screen in CSV and PDF format reflecting the active filters and search.
- Audit trail capturing who performed what action, when, and from which IP address.
- Common notification centre and personal profile / change-password screen for every authenticated user.

7.2 Module Access Matrix

The matrix below shows which sub-modules are available to each role and at what level (V = View only, E = Editable / can act, — = Not available). All views are further scoped to the role's territorial level.

Sub-Module	Super Admin	Central Admin	State NO	Implementing Authority/ Nodal Officer (N.O.)	US/SO	NISD
8.1 User Management	E	V (limited)	—	—	—	—
8.2 Role and Permission	E	V	—	—	—	—
8.3 Survey Management	E (sys)	V (sys)	V (state)	E (district)	—	—
8.4 Beggary Scheme	E	V (sys)	V (state)	E (district)	—	—
8.5 Persons	V (sys)	V (sys)	V (state)	V (district)	—	—
8.6 MIS Reports	V (sys)	V (sys)	V (state)	V (district)	—	—
8.7 Master Setting	E	V	—	—	—	—
8.8 Notification	E	E (limited)	E (state)	E (district)	—	—
8.9 Performance Statistics	V (sys)	V (sys)	V (state)	V (district)	—	—
8.10 Fund Monitoring	V (sys)	V (sys)	V (state)	E (district) — Sec 11	E — Sec 14	E — Sec 15
8.11 Comprehensive Rehab	V (sys)	V (sys)	V (state)	V (district)	—	—

8. Super Admin Module

The SuperAdmin is the highest-privileged role on the SMILE Backend Admin Panel. The SuperAdmin owns user provisioning, role and permission configuration, master data, system-wide notifications, and full visibility into all surveys, beneficiaries, schemes, IAs, performance metrics, fund flow, and rehabilitation outcomes across every state and district.

The SuperAdmin module is organised into the following eleven sub-modules:

- 8.1 User Management
- 8.2 Role and Permission
- 8.3 Survey Management
- 8.4 Beggary Scheme
- 8.5 Persons
- 8.6 MIS Reports
- 8.7 Master Setting
- 8.8 Notification
- 8.9 Performance Statistics
- 8.10 Fund Monitoring (View only)
- 8.11 Comprehensive Rehabilitation (8.11.1 Skill & Training; 8.11.2 Comprehensive Rehab Data)

8.1 User Management

The User Management sub-module enables the SuperAdmin to view, create, edit, and deactivate every user account in the system, irrespective of role, state, or district.

8.1.1 Users — List View

On selecting User Management → Users, the SuperAdmin is presented with a paginated tabular listing of all users in the system. The table supports sorting, server-side pagination, global search, and column-level filters.

Table columns:

#	Column	Description
1	S.No.	Auto-generated serial number based on the current page and sort order.
2	Name	Full name of the user as captured at the time of creation.
3	Username	System-generated or admin-assigned unique username used for login.
4	Email ID	Registered email address of the user.
5	Mobile	Registered 10-digit mobile number used for OTP and SMS notifications.
6	Role	Role assigned to the user (e.g., Central Admin, State Nodal Officer, Implementing Authority/Nodal Officer (N.O.) Officer, IA, US/SO, NISD).
7	State	State / UT to which the user belongs (where applicable).
8	District	District to which the user belongs (where applicable).

#	Column	Description
9	Created On	Timestamp at which the user was created.
10	Action	Row-level action menu — Edit, Assign Permission, Update Password, Delete.
11	Status	Active/Inactive status for the Users onboarded.

Row-Level Actions

- **Edit** — Opens the user record in edit mode; the SuperAdmin can update Name, Email, Mobile Number, Designation, Office Address, State, and District. Role reassignment triggers a confirmation dialog and an audit log entry.
- **Assign Permission** — Opens a drawer/modal listing every permission applicable to the user's role. The SuperAdmin can grant or revoke specific permissions on top of the role's default permission set.
- **Update Password** — Opens a password-reset page. The SuperAdmin will update the password by providing a new password and confirm the new password.
- **Delete** — Soft-deletes the user (marks as Inactive) after a confirmation dialog. The system shall not allow hard delete; soft-deleted users are retained for audit and may be restored from a 'Deleted Users' filter.

Filters, Search and Download

- Filters: State (from State master); District / City (dependent on State).
- Search: case-insensitive partial match across Name, Username, Email ID, Mobile.
- Download: Download CSV and Download PDF reflect active filters and include filter context as a header in the exported file.

8.1.2 Add User

Add User is exposed as a primary button on the Users list view. Form fields:

Field	Type	Mandatory	Description / Validation
Role	Single-Select Dropdown	Yes	From the active roles master. Drives State/District field visibility and default permission set.
Name of User	Text	Yes	Min 3 characters, max 100.
State	Single-Select Dropdown	Yes (where applicable)	Mandatory for State Nodal Officer, Implementing Authority/Nodal Officer (N.O.) Officer, IA.
Email ID	Email	Optional	Standard email format; unique across active users.
Designation	Text	Optional	Used in reports and notifications.

Field	Type	Mandatory	Description / Validation
Mobile Number	Numeric	Yes	10-digit Indian mobile; unique across active users.
Office Address	Text Area	Optional	Up to 500 characters.

On submission the system validates uniqueness, auto-generates username if not supplied, triggers welcome email/SMS, and records the creation in the audit log.

US/SO and NISD User Creation — When the SuperAdmin creates a US/SO or NISD user, the role-specific fields (Name, Mobile Number, Email ID, Designation) are captured here.

8.2 Role and Permission

8.2.1 Role — List View

#	Column	Description
1	Sr. No.	Auto-generated serial number.
2	Role	Display name of the role (Central Admin / Central Ministry, State Nodal Officer, Implementing Authority/Nodal Officer (N.O.) Officer, Implementing Agency, US/SO, NISD, Surveyor).
3	Action	Edit — on click, the SuperAdmin can update the default permission set for the selected role.

8.2.2 Permission — List View

Master list of permissions defined in the system, with underscore-separated identifiers.

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Permissions (with Underscore)	Examples: user_create, user_edit, role_edit, survey_view_all, beneficiary_export, fund_release_create, fund_release_view, rehab_skill_view, rehab_data_view.

8.3 Survey Management

8.3.1 Survey List

A tabular listing of all surveys created by every Implementing Authority/Nodal Officer (N.O.) Officer in the system. Standard listing capabilities apply — search, sort, pagination, and filtering by State and District. Detailed columns will be finalised during the requirement workshop with the Implementing Authority/Nodal Officer (N.O.) Officer module.

8.3.2 Surveyor Mapped

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Name	Full name of the surveyor.
3	State	State to which the surveyor's IA belongs.
4	City	City / district to which the surveyor's IA belongs.
5	Specific Survey Location	The exact survey location to which the surveyor is mapped.
6	Created On	Timestamp at which the mapping was created by the IA.
7	Remark	Free-text remark recorded by the IA.
8	Status	Active / Inactive.
9	Action	View Surveyor — opens the detailed surveyor profile.

Filters

- State, District.

8.4 Beggary Scheme

8.4.1 Beggary Scheme List

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Username	Login username of the agency representative.
3	IA / NGO / Agency Name	Registered name of the agency.
4	Agency Type	From masters (NGO, IA, Agency).
5	State	State of operation.
6	District / City	District / City of operation.
7	Submitted By	Name of the user who submitted the registration / claim.
8	Current Status	Pending Approval, Approved, Rejected, Under Review.
9	Submitted To	Role to whom the submission is currently routed.

Filters and Download

- Filters: State, District. Download: CSV / PDF reflecting active filters.

8.5 Persons Module

Three sub-screens — Person List, Mobilisation Survey List, Shelter Home.

8.5.1 Person List

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary ID	Unique ID generated for each Beneficiary
3	Beneficiary Name	Name of the beneficiary.
4	Age	Age in years.
5	Gender	Male / Female / Transgender.
6	State	State of identification.
7	District / City	District / City of identification.
8	IA Name	IA whose surveyor captured the record.
9	Type	Implementing Agency/NGO/Agency
10	Action	View Beneficiary Details (Complete details of the Beneficiary)

Filters and Download

- Filters: IA, State, District, Age, Gender. Download: CSV / PDF.

8.5.2 Mobilisation Survey List

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary Name	Name as captured.
3	Beneficiary ID	System-generated unique identifier.
4	Gender	Male / Female / Transgender.
5	Age	Age in years.
6	Type	Adult / CNCP.
7	Status	Mobilised / Under Mobilisation.
8	State	State of identification.

#	Column	Description
9	District	District of identification.
10	Date	Date of status update.
11	Mobilised / Under-Mobilised by Surveyor Name	Surveyor responsible for the mobilisation action.
12	Action	View Beneficiary Detail.

Filters and Download

- Filters: Status, State, District, Gender. Download: CSV / PDF.

8.5.3 Shelter Home

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary Name	Beneficiary name.
3	Gender	Male / Female / Transgender.
4	Age	Age in years.
5	Survey Location	Original survey location.
6	State	State of identification.
7	Shelter Home Type	Government / NGO-run / Private; Adult / CNCP-specific.
8	Beneficiary Type	Adult / CNCP.
9	Shelter Home Name	Registered shelter name.
10	Facility Status	Active / Full / Closed / Under Inspection.
11	Action	View Beneficiary.

Filters and Download

- Filters: State, District. Download: CSV / PDF.

8.6 MIS Reports

System-wide downloadable reports across all key programme dimensions. Every report supports search and filter based on the state and district; CSV / PDF exports reflect the active filters and include a header row showing the total record count.

8.6.1 Mobilised Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary Name	Name as captured.
3	Beneficiary ID	Unique identifier.
4	Age	Age in years.
5	Gender	Male / Female / Transgender.
6	Type	Adult / CNCP.
7	State	State of identification.
8	District / City	District / City of identification.
9	IA Name	IA responsible.
10	Mobilisation Date	Date of mobilisation.
11	Shelter Home Name	Destination shelter.
12	Status	Mobilised / Under Mobilisation.

8.6.2 Rehabilitated Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary Name	Name as captured.
3	Beneficiary ID	Unique identifier.
4	Age	Age in years.
5	Gender	Male / Female / Transgender.
6	Type	Adult / CNCP.
7	State	State of rehabilitation.
8	District / City	District / City of rehabilitation.
9	Shelter Home / Rehab Centre	Facility where rehabilitation was carried out.
10	Rehabilitation Type	Skill training / Education / Livelihood / Health services / De-addiction / Other.
11	Start Date	Rehabilitation start date.

#	Column	Description
12	Completion Date	Rehabilitation completion date.
13	Outcome / Remarks	Successful / Discontinued / Re-referred + free text.

8.6.3 Beneficiary Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Beneficiary Name	Name as captured.
3	Beneficiary ID	Unique identifier.
4	Age	Age in years.
5	Gender	Male / Female / Transgender.
6	Type	Adult / CNCP.
7	Aadhaar Available	Yes / No / Yes but unavailable.
8	State	State of identification.
9	District / City	District / City of identification.
10	Survey Location	Specific survey location.
11	IA Name	IA whose surveyor captured the record.
12	Surveyor Name	Surveyor who captured the record.
13	Date of Identification	Date the survey was submitted.
14	Current Status	Identified / Mobilised / Rehabilitated / Closed.

8.6.4 Shelter Home Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Shelter Home Name	Registered name.
3	Shelter Home Type	Government / NGO-run / Private; Adult / CNCP.
4	State	State of location.
5	District / City	District / City of location.
6	Address	Full address.

#	Column	Description
7	Capacity	Total capacity.
8	Current Occupancy	Current beneficiary count.
9	Operational Status	Active / Full / Closed / Under Inspection.
10	Onboarded On	Date of onboarding.
11	Contact Person	Name and mobile of in-charge.

8.6.5 IA / Agency / Institute Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	IA / Agency / Institute Name	Registered name.
3	Agency Type	IA / NGO / Government Institution / Other.
4	Registration Number	Society / Trust / Section 8 registration number.
5	Darpan ID	NGO Darpan unique identifier.
6	State	State of operation.
7	District / City	District / City of operation.
8	Date of Onboarding	Approval date.
9	Surveyors Mapped	Active surveyor count.
10	Beneficiaries Identified	Total identified to date.
11	Status	Active / Inactive / Suspended.
12	Contact Person	Name and mobile.

8.6.6 Survey Location Report

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Survey Name	Name given by the Implementing Authority/Nodal Officer (N.O.) Officer.
3	Specific Survey Location	Exact location text/landmark.

#	Column	Description
4	State	State of the survey.
5	District / City	District / City of the survey.
6	Survey Type / Area Category	Per master.
7	Schedule	Start and end date.
8	Duration (days)	Total duration.
9	IAs Assigned	List of IAs.
10	Surveyors Mapped	Total surveyors.
11	Beneficiaries Identified	Total beneficiaries at this location.
12	Status	Open / Closed / Completed.

8.7 Master Setting

Central configuration surface for all reference data used by the mobile application and the admin panel.

Master Category	Examples / Coverage	Used By
Geography Masters	Country, State / UT, District, City / ULB, Block, Gram Panchayat	Both
Role & Permission Masters	Roles, Permissions, Role-Permission mapping	Admin Panel
Survey Questionnaire Masters	Survey Locations, Beggary Factors, Years engaged slabs, Daily Earning slabs, Solicitation methods, Expenditure heads, Education status, Religion, Social Background, Schemes covered, Government ID types, Bank Account Types, Marital Status, Family Relationship, Authorities (counselling/custody)	Mobile App
Agency Masters	Institute Types (NGO, Section 8, Trust, Society, Government, Other), Shelter Home Types, Rehabilitation Support Types, Skill / Trade list, Vocational Course list	Both
Operational Masters	Survey Time Slots, Beneficiary Status values, Notification Templates, Email & SMS Templates	Both
Fund Management Masters	Scheme Heads, Fund Categories, Sanction Types, Utilisation Heads, Installment values (1st, 2nd, 3rd), Phase values (1, 2, 3)	Admin Panel

Master Category	Examples / Coverage	Used By
Rehabilitation Masters	Type of Rehabilitation (Wage Employment, Self Employment, Skill Training, Reunited with Family, Care Home, Child Welfare, Other), Skilling Categories, Sectors / Industries, Government Schemes for convergence, Follow-up Status values (Active, Lost to Follow-up, Relapsed, Transferred, Deceased)	Admin Panel

8.8 Notification

#	Column	Description
1	S.No.	Auto-generated serial number.
2	Notification Title	Subject line of the notification.
3	Notification Type	System-Generated / Broadcast.
4	Channel	In-App / SMS / Email / Push / Combination.
5	Target Audience	User / Role / State / District / All Users.
6	Sent By	Username of the issuer (System for system-generated).
7	Sent On	Date and time of dispatch.
8	Recipients	Total intended recipients.
9	Delivered	Successful deliveries.
10	Read	Recipients who read.
11	Status	Sent / Pending / Partially Failed / Failed.
12	Action	View Detail.

8.9 Performance Statistics

8.9.1 State-Wise Performance

#	Metric	Description / Source
1	Total Cities Covered	Distinct count of cities / districts in the state with at least one survey.
2	Total Beneficiary Identification	Total beneficiaries identified through completed surveys in the state.

#	Metric	Description / Source
3	Total Beneficiary Rehabilitated	Beneficiaries with rehabilitation status = Completed.
4	Total Fund Released	Sum of fund-release entries (NISD) routed to districts in the state.
5	Total Fund Utilised	Sum of utilisation entries reported by Implementing Authority/Nodal Officer (N.O.) in the state.
6	Total Implementing Agencies	Distinct count of active IAs operating in the state.

8.9.2 District / City-Wise Performance

#	Metric	Description / Source
1	Total Beneficiary Identified	Total beneficiaries identified in the district.
2	Total Beneficiary Rehabilitated	Total beneficiaries rehabilitated in the district.
3	Total Fund Released	Sum of fund-release entries routed to the district.
4	Total Fund Utilised	Sum of utilisation entries reported by IAs in the district.
5	Total Implementing Agencies	Distinct active IAs in the district.

8.10 Fund Monitoring

The Fund Monitoring sub-module provides the SuperAdmin with a consolidated, system-wide, view-only window into the entire fund-flow lifecycle: from sanction (recorded by US/SO), through release to district (recorded by NISD), through onward release from the Implementing Authority/Nodal Officer (N.O.) Officer to the Implementing Agencies (offline).

Fund Monitoring is presented as three integrated tabs that mirror the three editable surfaces of US/SO, NISD, and Implementing Authority/Nodal Officer (N.O.) Officer (Sections 14, 15, and 11.4 respectively). The SuperAdmin sees all three with no edit capability.

8.10.1 Tab 1 — Sanction Order Tracker (mirrors US/SO entry)

Table columns:

#	Column	Description
1	S.No.	Auto-generated serial number.
2	State / UT	State / UT for which the sanction was raised.

#	Column	Description
3	Amount	Sanctioned amount in INR.
4	Uploaded Date	Date the sanction order was uploaded by US/SO.
5	Installment	1st / 2nd / 3rd.
6	Currently With	Current owner in the workflow — US/SO / NISD / Implementing Authority/Nodal Officer (N.O.) Officer / IA.
7	Sanctioned Date	Date of the sanction order.
8	Release Date	Date of release to State / UT (populated when NISD records the release).
9	Nodal Officer Released	Whether the State Nodal Officer / DA has acknowledged the release.
10	Days Total	Total days elapsed from sanction date to current state — auto-calculated.
11	Action	View — read-only mode; download of the uploaded sanction order PDF.

8.10.2 Tab 2 — NISD Release Tracker (mirrors NISD entry)

#	Column	Description
1	S.No.	Auto-generated serial number.
2	State / UT	State / UT to which NISD released funds.
3	Amount	Total amount released.
4	Uploaded Date	Date NISD recorded the release in the system.
5	Installment No.	1st / 2nd / 3rd.
6	Installment Amount	Amount of this specific installment.
7	Days Total	Days elapsed from sanction date to NISD release date.
8	Action	View.

8.10.3 Tab 3 — Implementing Authority/Nodal Officer (N.O.) Officer Onward Release Tracker

#	Column	Description
1	S.No.	Auto-generated serial number.

#	Column	Description
2	State / UT	State / UT.
3	District	District of the Implementing Authority/Nodal Officer (N.O.) Officer.
4	Funds Received from NISD	Amount received.
5	Date Funds Received from NISD	Auto-populated from the NISD release entry.
6	IA Name	IA / NGO to whom the Implementing Authority/Nodal Officer (N.O.) Officer released funds.
7	Date Released to NGO / IA	Date of onward release.
8	Agency	Agency type and other identifying data.
9	Amount Released to NGO	Onward amount released.
10	Action	View.

8.10.4 Filters and Download

- Filters — State / UT, District, Installment, Phase, Date range, Currently With.
- Download — CSV and PDF, reflecting active filters, including all three tabs as separate sheets in CSV exports.

8.11 Comprehensive Rehabilitation

The Comprehensive Rehabilitation sub-module tracks every beneficiary's rehabilitation journey — from skill & training enrolment to long-term outcome at 1 Year follow-up at 3 month, 6month and Final 1 Year. It is presented as two screens — Skill and Training (8.11.1) and Comprehensive Rehabilitation Data (8.11.2).

8.11.1 Skill and Training

Tabular listing of every beneficiary currently enrolled in or who has completed a skill & training programme.

Table columns:

#	Column	Description
1	S_No	Auto-generated serial number.
2	Person Name	Beneficiary name.
3	Gender	Male / Female / Transgender.
4	Age	Age in years.

#	Column	Description
5	Duration of Skill and Training	Duration of the programme (e.g., 3 months, 6 months) — supports both predefined slabs from the master and free-text override.
6	Skill and Training Type	Skill or trade — populated from the Skill / Trade master (e.g., Beautician, Carpentry, IT, Driving, Tailoring).
7	Survey Location	Location at which the beneficiary was originally identified.
8	Shelter Name	Shelter home (if any) currently housing the beneficiary.
9	State	State of identification.
10	District	District of identification.
11	Action	View — opens the full skill & training record with start date, expected completion date, attendance, certification status, and any notes uploaded by the IA.

Filters and Download

- Filters: State, District, Skill / Training Type, Status (In Progress / Completed / Discontinued), Date range.
Download: CSV / PDF.

8.11.2 Comprehensive Rehabilitation Data

Tabular listing of the full rehabilitation record for every beneficiary, modelled on the SMILE Rehabilitation Data Format. Mobile Number and Email ID columns are added per the v3.1 update so that each beneficiary's contactability post-rehabilitation can be tracked alongside the outcome.

The columns are organised into six logical groupings — Basic Information, Rehabilitation Type, Wage Employment Details, Self-Employment / Enterprise Details, Government Scheme / Convergence, and Follow-up Status.

Group A — Basic Information

#	Column	Description
1	S.No.	Auto-generated serial number.
2	City	City of identification / rehabilitation.
3	Name of Beneficiary	Full beneficiary name.
4	Admin No. / Program Participant ID	Unique programme participant identifier.
5	Sex	Male / Female / Other.
6	Age	Age in years.
7	Mobile Number	10-digit mobile number of the beneficiary or guardian

#	Column	Description
8	Email ID	Email of the beneficiary or guardian

Group B — Rehabilitation Type

#	Column	Description
9	Type of Rehabilitation	Wage Employment / Self Employment / Skill Training / Reunited with Family / Care Home / Child Welfare / Other.
10	Rehabilitation / Skilling Category	e.g., Tailoring, IT, Driving, Masonry — populated from the master.
11	If 'Other' Type — Specify Details	Free text; mandatory if Type = Other.

Group C — Wage Employment Details (shown when Type = Wage Employment)

#	Column	Description
12	Employer Name	Employing organisation / individual.
13	Employer Address / Location	Full employer address.
14	Sector / Industry	Sector master (e.g., Hospitality, Manufacturing, Construction, IT).
15	Designation / Role	Role title.
16	Wage Type	Daily / Monthly.
17	Monthly Income (Rs.)	Monthly wage in INR.

Group D — Self-Employment / Enterprise Details (shown when Type = Self Employment)

#	Column	Description
18	Type of Business / Enterprise	Nature of the enterprise (e.g., Tailoring, Street Vending, Beauty Parlour).
19	Business Location	Address / locality of the enterprise.
20	Finance Support Received	Yes / No.
21	Source of Finance Support	Scheme / NGO / Self — shown if Finance Support = Yes.
22	Monthly Income (Rs.)	Average monthly income from the enterprise.

Group E — Government Scheme / Convergence

#	Column	Description
23	Convergence with any Govt. Scheme	Yes / No.
24	Govt. Scheme Name (if any)	Specific scheme name (e.g., PMJDY, PMAY, Ayushman Bharat) — shown if Convergence = Yes.
25	Benefit Received under Scheme	Free-text description of the benefit availed.

Group F — Follow-up Status

#	Column	Description
26	1- Year Follow-up Status	Active / Lost to Follow-up / Relapsed / Transferred / Deceased.
27	Action	View — opens the full record with all groups visible, change history, and supporting documents.

Filters and Download

- Filters: State, District / City, Type of Rehabilitation, Sex, Age range, 1 Year Follow-up Status, Convergence (Yes / No), Date range.
- Download: CSV and PDF. The CSV export shall preserve the full column set across all six groups so that the export remains a faithful reproduction of the SMILE Rehabilitation Data Format.

Conditional Fields — Conditional fields — Wage Employment columns appear only when Type of Rehabilitation = Wage Employment, and Self-Employment columns appear only when Type = Self Employment. The list view shows all columns by default for the SuperAdmin; the form (View / Edit detail) hides irrelevant groups based on Type.

9. Central Admin / Central Ministry Module

The Central Admin / Central Ministry represents MoSJE / NeGD at the central level. The role provides cross-state oversight and approval and consumes consolidated views of state and district performance, scheme execution, fund flow, and rehabilitation outcomes.

Sub-module access (per Section 7.2):

- 8.1 User Management — limited view (e.g., view all users, no edit on Super Admin).
- 8.2 Role and Permission — view only.
- 8.3 to 8.6, 8.9, 8.10, 8.11 — system-wide view across all states and districts.
- 8.7 Master Setting — view only (configuration is the SuperAdmin's responsibility).
- 8.8 Notification — limited compose (cross-state broadcasts subject to permission).
- Fund Monitoring (8.10) — view only
- Comprehensive Rehabilitation (8.11) — view only, system-wide.

Placeholder — *Central Admin sub-module screens reuse the SuperAdmin layouts (Sections 8.1 to 8.11) with action buttons hidden where the role is view-only. No bespoke Central-Admin-only screens are required, except for any cross-state approval queues identified in the requirement workshop. This section will be extended in v3.2 if such bespoke screens are confirmed.*

10. State Nodal Officer Module

The State Nodal Officer (SNO) is the programme owner at the State / UT level. The SNO accesses the same set of programme sub-modules as the SuperAdmin but scoped to the State / UT to which the SNO is mapped.

Sub-module access (per Section 7.2):

- 8.3 Survey Management, 8.4 Beggary Scheme, 8.5 Persons, 8.6 MIS Reports, 8.9 Performance Statistics, 8.10 Fund Monitoring, 8.11 Comprehensive Rehabilitation — view, scoped to the state.
- 8.8 Notification — compose, scoped to the state (district-wide or state-wide broadcasts).
- 8.1 User Management, 8.2 Role and Permission, 8.7 Master Setting — not available.

Note — State scope filtering is enforced at the API gateway (data layer) and reinforced at the UI layer (filter dropdowns are pre-populated and locked to the SNO's state). The SNO cannot bypass scope by URL manipulation.

Placeholder — *State-scoped dashboard composition, escalation workflows, and any approval-matrix items unique to the SNO will be finalised in the requirement workshop with one or more representative State Nodal Officers.*

11. Implementing Authority/Nodal Officer (N.O.) Officer Module

11.1 Sub-Module Access

The Implementing Authority/Nodal Officer (N.O.) Officer accesses the same set of programme sub-modules as the SuperAdmin, scoped to the District.

- 8.3 Survey Management — editable (creates surveys, assigns to IAs, approves IA registration), district-scoped.
- 8.4 Beggary Scheme — editable (approval of agency submissions in the district).
- 8.5 Persons, 8.6 MIS Reports, 8.9 Performance Statistics, 8.11 Comprehensive Rehabilitation — view, scoped to the district.
- 8.8 Notification — compose, scoped to the district.
- 8.10 Fund Monitoring — Update the

11.2 Survey location Creation & Assignment

- Create a survey location — Survey location (Dropdown), State (Static based on login), District (Static based on login) , Address, Pincode
- Upon Submission, the created survey location will be visible to Implementing Authority/Nodal Officer (N.O.).
- Implementing Authority/Nodal Officer (N.O.) can assign the Survey location to the onboarded IA's.

11.3 Record Review

- Review beneficiary records forwarded by IAs after IA's approval.
- Approve, or raise clarification on a forwarded record.
- Approved records progress to the rehabilitation pipeline; clarification records route back to the IA.

11.4 Fund Management — Implementing Authority/Nodal Officer (N.O.) Officer Fields

In the Fund Management module, the Implementing Authority/Nodal Officer (N.O.) Officer is the third editable stakeholder (after US/SO and NISD). The Implementing Authority/Nodal Officer (N.O.) Officer records the receipt of funds from NISD and the onward release of those funds to the Implementing Agencies / NGOs operating in the district.

Fields available to the Implementing Authority/Nodal Officer (N.O.) Officer for editing:

Field	Type	Source / Behaviour	Description
Funds Received from NISD	Static Text Field	Auto-populated	Auto-fills from the NISD release entry corresponding to the Implementing Authority/Nodal Officer (N.O.) Officer's district. Read-only on this surface.
Date Funds Received from NISD	Static (Calendar)	Auto-populated	Auto-fills from the NISD release entry. Read-only on this surface.
IA Name	Text Field / Dropdown	Editable	IA / NGO to whom the funds are being released. May be a free-text field or a dropdown of IAs active in the district (to be confirmed).
Date Released to NGO / IA	Calendar	Editable	Date the funds were released by the Implementing Authority/Nodal Officer (N.O.) Officer to the IA / NGO.
Agency	Text / Dropdown	Editable	Agency-type metadata (NGO / Section 8 / Trust / Society) and registration reference.
Amount Released to NGO	Numeric (INR)	Editable	Amount released to the IA / NGO. Must be less than or equal to the residual balance of funds received from NISD for the same installment / phase.

Implementing Authority/Nodal Officer (N.O.) Officer Fund Monitoring view (Tab 3) shows the columns described in Section 8.10.3, scoped to the district. The Implementing Authority/Nodal Officer (N.O.) Officer can add new onward-release rows and edit rows that are still in 'Draft' status; rows acknowledged by the IA are locked from further edits.

Section 11.5 — Shelter Home User Management

The DA / Nodal Officer can create Shelter Home users directly (auto-activated) and approve/reject Shelter Home users created by IAs in the district.

Placeholder — Validation rules — including residual-balance enforcement, edit-window limits, and the workflow state machine for draft / submitted / locked rows — to be finalised in the Fund Management requirement workshop.

12. Surveyor Module (Mobile App Only)

The Surveyor role is exclusively a mobile-app role; surveyors do not access the web admin panel. The surveyor's complete functional scope is specified in Section 6.4 of this BRD with the field-level questionnaire defined in Annexure A.

Summary of Surveyor responsibilities:

- OTP-based login on the mobile application.
- View dashboard tiles — Total Conducted Survey, Pending Survey, Returned Seeking Clarification, Approved Beneficiary Data.
- View list of surveys mapped to them by the IA.
- Conduct field survey — capture consent, geo-location, Aadhaar, live photograph, and questionnaire responses.
- Capture e-signature and submit; offline capture is supported with auto-sync on reconnect.
- Update mobilisation status of the beneficiary post-survey.
- Receive clarifications from the IA / Implementing Authority/Nodal Officer (N.O.) Officer and resubmit corrected records.
- Sidebar navigation to Pending Survey Location, Pending Clarification, Total Conducted Survey, Pending Approval, Profile, Logout.

13. Under Secretary / Section Officer (US/SO) Module

The Under Secretary / Section Officer (US/SO) operates the Fund Management module on the web portal. US/SO is the first editable stakeholder in the fund flow — recording sanction-order details for each State / UT installment and uploading the sanction order itself.

Scope Restriction — US/SO has no access to any sub-module other than Fund Management. The Fund Management screen is also the US/SO's landing page on login.

13.1 US/SO User — Fields at User Creation

When a SuperAdmin creates a US/SO user (via the User Management module — Section 8.1.2), the following role-specific fields are captured:

Field	Type	Mandatory	Description
Name	Text	Yes	Full name of the US/SO user.
Mobile Number	Numeric	Yes	10-digit mobile number for OTP and SMS notifications.
Email ID	Email	Yes	Official email address of the US/SO user.
Designation	Text	Yes	Designation within the Ministry / Section.

13.2 Fund Management — US/SO Editable Surface

On login, the US/SO lands on the Fund Management screen. The US/SO can record a new sanction-order entry and view all entries previously recorded.

13.2.1 New Sanction Entry — Form Fields

Field	Type	Mandatory	Description / Validation
Amount	Text Field (Numeric)	Yes	Sanctioned amount in INR. Numeric input with thousand separators on display.
Date of Sanction Order	Calendar (Date Picker)	Yes	Date on which the sanction order was issued.
City / District	Single-Select Dropdown	Yes	Beneficiary district as per the sanction order. Populated from the District master.
Installment	Single-Select Dropdown	Yes	1st / 2nd / 3rd.

Field	Type	Mandatory	Description / Validation
Phase	Single-Select Dropdown	Yes	1 / 2 / 3 — phase of the scheme execution.
Upload Sanction Order	File Upload (Button)	Yes	PDF upload of the sanction order. Max 10 MB. Visible to all view-only stakeholders in their respective Fund Monitoring scopes.

13.2.2 US/SO Sanction List — Table Columns

#	Column	Description
1	S.No.	Auto-generated serial number.
2	State / UT	State / UT for which the sanction was raised. Derived from the selected District.
3	Amount	Sanctioned amount.
4	Uploaded Date	Date the sanction order was uploaded by the US/SO.
5	Installment	1st / 2nd / 3rd.
6	Currently With	Current owner in the workflow — US/SO / NISD / Implementing Authority/Nodal Officer (N.O.) Officer / IA. Auto-updated as the workflow progresses.
7	Sanctioned Date	Date of the sanction order.
8	Release Date	Date of release to the State / UT (populated when NISD records the release in the next stage).
9	Nodal Officer Released	Yes / No — set when the Implementing Authority/Nodal Officer (N.O.) Officer acknowledges receipt and records onward release.
10	Days Total	Total days elapsed from Sanctioned Date to current state — auto-calculated.

Filters and Download

- Filters: State / UT, District, Installment, Phase, Date range.
- Download: CSV and PDF reflecting active filters.

14. NISD Module

The National Institute of Social Defence (NISD) is the second editable stakeholder in the fund flow. NISD records the funds received (from the central scheme allocation) and the onward release of those funds to the relevant State / UT for each installment.

Scope Restriction — NISD has no access to any sub-module other than Fund Management. The Fund Management screen is also the NISD user's landing page on login.

14.1 NISD User — Fields at User Creation

When a SuperAdmin creates a NISD user, the following role-specific fields are captured:

Field	Type	Mandatory	Description
Name	Text	Yes	Full name of the NISD user.
Mobile Number	Numeric	Yes	10-digit mobile number for OTP and SMS notifications.
Email ID	Email	Yes	Official email address.
Designation	Text	Yes	Designation within NISD.

14.2 Fund Management — NISD Editable Surface

14.2.1 New NISD Release Entry — Form Fields

Field	Type	Mandatory	Description / Validation
Funds Received	Static Text Field	Auto-populated	Auto-fills from the corresponding US/SO sanction-order entry. Read-only.
Date Received	Static (Calendar)	Auto-populated	Auto-fills from the US/SO entry. Read-only.
Date of Sanction Order	Static / Display	Auto-populated	Display-only field showing the original sanction date for reference.
Release Date by NISD	Calendar (Date Picker)	Yes	Date on which NISD released the funds to the State / UT.

14.2.2 NISD Release List — Table Columns

#	Column	Description
1	S.No.	Auto-generated serial number.
2	State / UT	State / UT to which NISD released funds.

#	Column	Description
3	Amount	Total amount released.
4	Uploaded Date	Date NISD recorded the release entry in the system.
5	Installment No.	1st / 2nd / 3rd.
6	Installment Amount	Amount of the specific installment released.
7	Days Total	Days elapsed from sanction date to NISD release date — auto-calculated.

Filters and Download

- Filters: State / UT, Installment No., Date range.
- Download: CSV and PDF reflecting active filters.

15. Fund Management — Integrated Workflow

The Fund Management module is a single integrated workflow with three editable surfaces (US/SO, NISD, Implementing Authority/Nodal Officer (N.O.) Officer) and view-only surfaces for SuperAdmin, Central Admin, State Nodal Officer, and IA-Web. Each editable surface contributes specific fields; the system links the entries through the State / UT, District, Installment, and Phase keys.

15.1 Stakeholder Editability Summary

Stakeholder	Editable	View Only	Landing Page
US/SO	Sanction Order entry (amount, date, district, installment, phase, upload)	Own previous entries	Fund Management
NISD	Release entry (release date, installment amount)	Own previous entries; US/SO sanction entries (read-only fields auto-populated)	Fund Management
Implementing Authority/Nodal Officer (N.O.) Officer	Onward release (IA name, date released to NGO/IA, agency, amount)	All upstream entries for own district (Tabs 1 and 2)	Default DA dashboard; Fund Management is a sub-menu
SuperAdmin	—	All three tabs system-wide	SuperAdmin dashboard
Central Admin	—	All three tabs system-wide	Central Admin dashboard

Stakeholder	Editable	View Only	Landing Page
State Nodal Officer	—	All three tabs scoped to state	SNO dashboard

15.2 End-to-End Fund Lifecycle

- Step 1 — US/SO records the sanction order entry (Section 14.2.1) and uploads the sanction order PDF.
- Step 2 — NISD locates the corresponding US/SO entry; the system auto-populates 'Funds Received' and 'Date Received' on the NISD form. NISD records the Release Date and the installment amount (Section 15.2.1).
- Step 3 — Implementing Authority/Nodal Officer (N.O.) Officer of the corresponding district sees the NISD release in their Fund Monitoring → Tab 3 surface; auto-populated fields show 'Funds Received from NISD' and 'Date Funds Received from NISD'.
- Step 4 — Implementing Authority/Nodal Officer (N.O.) Officer records the onward release to the IA / NGO (Section 11.4) — IA Name, Date Released to NGO / IA, Agency, Amount Released to NGO.
- Step 5 — Reconciliation views (SuperAdmin, Central Admin, State Nodal Officer) reflect Released vs Utilised vs Pending across the three tabs.

15.3 Fund Lifecycle — Swimlane

US/SO	NISD	Implementing Authority/Nodal Officer (N.O.) Officer	SuperAdmin / Central / SNO
Records sanction order entry; uploads PDF and forward to NISD	—	—	Sees in Tab 1 (view)
—	Records release date & installment and forward to Implementing Authority/Nodal Officer (N.O.)	—	Sees in Tab 2 (view)
—	—	Records onward release to IA	Sees in Tab 3 (view)
—	—	—	Sees reconciliation

16. Shelter Home User Module (dedicated stakeholder section)

This is the stakeholder section — what the Shelter Home user actually sees and does after login. **No user-creation features here**, only operational screens.

16.1 Shelter Home Dashboard

- KPI tiles scoped to the user's mapped shelter:
 - Current Occupancy (count) and Capacity Utilisation (%)
 - Beneficiaries Pending Conditions Update
 - Skill / Training In Progress
 - Skill / Training Completed
- Demographic breakdown within the shelter: Gender · Age band · Beneficiary Type (Adult / CNCP) · Conditions distribution.
- Activity feed: recent arrivals, skill enrolments, training completions, condition updates.
- Filters: Date range · Beneficiary Type · Gender · Age band · Skill/Training status.

16.2 Beneficiaries at My Shelter

- Tabular list of all beneficiaries currently assigned to the shelter.
- Columns: S.No., Beneficiary Name, Beneficiary ID, Age, Gender, Beneficiary Type (Adult / CNCP), Date of Arrival, Conditions Recorded (Yes / No), Skill Enrolled (Yes / No), Action (View / Update Conditions / Update Skill).
- Filters: Beneficiary Type, Gender, Age, Conditions recorded, Skill enrolled.
- Search by Name or Beneficiary ID.
- Download CSV / PDF.

16.3 Update Beneficiary Conditions

- For a selected beneficiary, the Shelter Home user can record one or more conditions of begging from the Beggary Conditions Master (multi-select).
- Free-text "Others — please specify" field if the beneficiary's condition isn't in the master list.
- Date of assessment and Assessor name (defaults to logged-in user) captured automatically.
- Edit history maintained (who updated, when, before/after values).

16.4 Update Skill & Training

- For a selected beneficiary, the Shelter Home user can:
 - Enrol the beneficiary in a skill / vocational training programme (single-select from the extended Skill / Trade master, with "Others — specify" option).
 - Capture: Start Date, Expected Completion Date, Duration (auto-calculated or manual override), Training Provider / Trainer Name, Mode (in-shelter / external partner), Attendance %, Certification Status (Pending / Issued / Not Applicable).
 - Update status: In Progress / Completed / Discontinued (with reason).
- All entries flow into the existing **Section 8.11.1 Skill and Training** view (Shelter Home is one of the upstream sources alongside the IA mobile app).

16.5 Update Shelter Home Facilities

- Single-screen multi-select checklist against the Shelter Home Facilities Master.
- For each facility, capture: Available (Yes / No), Last Inspected On, Remarks.
- "Others — specify" free-text rows for facilities not in the master.
- Save updates the shelter's facilities profile and stamps the last-update timestamp shown on the dashboard.

- Visible to Super Admin, Central Admin, State NO, DA / Nodal Officer, and the IA managing the shelter (per the cross-shelter tracker in 8.12.6).
- System shall flag the facilities profile as "due for review" if not updated within 90 days (BR-SHELTER-005).

16.6 My Shelter Profile (read-only)

- View-only display of the shelter's master record: Name, Type, Address, Capacity, Contact details, Onboarded On, Operational Status.
- Editing the master record itself is the DA / Nodal Officer's or Super Admin's responsibility.

16.7 Notifications

- View notifications addressed to the shelter or the user — new beneficiary assigned, IA / DA review requests, facility-update reminders.

16. Non-Functional Requirements

16.1 Performance

- Mobile form screens shall load within 2 seconds on supported Android devices.
- Sync of a single beneficiary record shall complete within 10 seconds on a 4G connection.
- Admin panel listing screens shall load within 3 seconds for the default 25-record page.
- Admin panel detail screens (incl. Fund Monitoring tabs and Comprehensive Rehabilitation record view) shall load within 3 seconds.
- CSV export of up to 50,000 records shall complete within 60 seconds; larger exports shall be queued and emailed to the requesting user.
- File uploads (Work Order / MoU PDF, Sanction Order PDF) up to 10 MB shall complete within 30 seconds on a stable connection.

16.2 Availability & Reliability

- The mobile app shall be fully functional offline for survey capture and draft management.
- Backend APIs and admin-panel uptime SLA — 99.5% measured monthly, excluding scheduled maintenance windows.
- Scheduled maintenance windows shall be communicated at least 48 hours in advance through in-app notifications and email.
- The system shall maintain a Recovery Point Objective (RPO) of 24 hours and a Recovery Time Objective (RTO) of 4 hours.

16.3 Security & Compliance

- Aadhaar number is captured as a typed 12-digit input. The system shall validate the Verhoeff checksum locally on the device and on the server. Aadhaar shall be encrypted on device, in transit, and at rest, and shall be masked on display post-entry (showing only the last four digits, e.g., XXXX-XXXX-1234).

- Darpan ID is captured as a typed input on IA self-registration with format validation. Verification is a manual administrative step performed by the Implementing Authority/Nodal Officer (N.O.) Officer at the time of approving the IA registration.
- Sanction Order details and UTR / payment reference numbers are captured manually as text inputs by US/SO, NISD, and Implementing Authority/Nodal Officer (N.O.) Officer where applicable; the uploaded Sanction Order PDF serves as the primary supporting document.
- All network calls shall use HTTPS / TLS 1.2 or higher with certificate pinning on the mobile app.
- Local mobile storage shall be encrypted using AES-256.
- Encryption at rest shall be applied to the relational database and to the object store holding sanction-order PDFs, Work Order / MoU PDFs, beneficiary photographs, and supporting documents.
- Admin-panel sessions shall enforce idle timeout (default 15 minutes) and absolute session timeout (default 8 hours), both configurable in Master Settings.
- Mobile-app sessions shall enforce idle timeout (default 30 minutes), with re-authentication via OTP on expiry.
- Passwords shall meet complexity requirements — minimum 8 characters, mix of upper/lower-case, numeric, and special characters; password reset shall require OTP confirmation on the registered mobile or email.
- RBAC shall be enforced at the API gateway and reinforced at the UI layer.
- Territorial scope (state / district / agency) shall be enforced at the API gateway for every list, search, filter, and detail call.
- All sensitive actions — user create / edit / delete, role / permission change, fund-flow entries (sanction, NISD release, DA onward release), IA approval / rejection, beneficiary status transitions, rehabilitation status updates, master-data edits — shall be captured in an immutable, append-only audit log. The audit log shall record the user, role, action, target record, before/after values (where applicable), timestamp, and IP address.
- The application shall comply with prevailing Government of India data-protection norms and the Digital Personal Data Protection Act (DPDP Act) including the consent, purpose-limitation, and storage-limitation principles applicable to a Data Fiduciary.
- Personally Identifiable Information (PII) — Aadhaar number, mobile number, photograph, beneficiary name and address — shall be protected with role-based, scope-filtered access and shall be visible only to authorised users.

16.4 Scalability & Extensibility

- The form engine shall be configurable to accommodate future questionnaire revisions without code changes.
- The Hindi string bundle shall be structured such that translations can be revised without code changes — only an updated bundle and a configuration push or app release.
- The admin panel shall be deployable on Government cloud (e.g., MeghRaj / NIC cloud) and shall support horizontal scaling of stateless service tiers.
- The system shall support up to 10,000 concurrent admin-panel users and 25,000 concurrent mobile-app users at peak without degradation beyond stated performance SLAs.

- Database design shall support partitioning / sharding by State or District to accommodate volume growth.
- The architecture shall provide connector points and field mappings to allow future integration of external systems without re-design of the core data model.

16.5 Usability & Accessibility

- All mobile screens shall support a language toggle between English and Hindi via the static string bundle.
- Font sizes and colour contrast shall meet WCAG 2.1 AA where applicable.
- Tap targets on the mobile app shall meet a minimum 44 × 44 dp size for primary actions.
- Form fields shall provide inline validation messages in the active language with clear, actionable wording.
- The admin panel shall be responsive and usable on screen widths from 1280 px upwards.
- The mobile app shall provide clear visual indicators for offline state, queued submissions, and successful sync.

16.6 Interoperability & Integration

- SMS / OTP gateway — for OTP delivery to IA and Surveyor mobile numbers and for password-reset flows.
- Firebase Cloud Messaging (FCM) — for push notifications to the mobile app.
- Email gateway (SMTP / transactional email service) — for activation, approval, rejection, and broadcast emails.

16.7 Maintainability & Observability

- The system shall expose application logs, request / response traces, and error rates to a centralised observability stack accessible to the technical operations team.
- Configuration parameters (session timeouts, file-size limits, OTP validity, language bundle version, feature flags) shall be managed centrally and shall not require a code release to change.
- Database backups shall run daily with a 30-day retention; weekly full backups shall be retained for 12 months.
- Source code, infrastructure scripts, and database schemas shall be version-controlled.

16.8 Data Quality & Integrity

- Mobile numbers shall be validated for length (10 digits) and Indian numbering plan format.
- Pincodes shall be validated for length (6 digits).
- Email addresses shall be validated for standard format.
- Mandatory fields shall be enforced at the form layer and re-validated at the API layer.
- At the time of beneficiary record submission, the system shall flag potential duplicates based on Aadhaar number across the system; flagged records are reviewed manually by the IA and the Implementing Authority/Nodal Officer (N.O.) Officer.
- Date fields (Sanction Date, Release Date, Date of Identification, Mobilisation Date, Follow-up Date) shall be subject to logical-order validation — for example, NISD Release Date cannot precede the Sanction Date, and Mobilisation Date cannot precede the Date of Identification.

17. Business Rules / Business Logic

17.1 Mobile / Survey Rules

BR-REG-001: One Mobile, One Account

Each mobile number shall be linked to only one active account.

BR-REG-002: IA Activation Gate

An IA account shall not be activated until the Implementing Authority/Nodal Officer (N.O.) Officer has approved the registration on the web portal.

BR-REG-003: Darpan ID Format

Darpan ID shall be format-validated at registration.

BR-SUR-001: Implementing Authority/Nodal Officer (N.O.) Officer Owns Survey Creation

Survey location shall be created exclusively by the Implementing Authority/Nodal Officer (N.O.) Officer on the web portal. The mobile application shall not expose any survey-location creation capability.

BR-SUR-002: IA Mapping Authority

Only an IA to whom a survey has been assigned by the Implementing Authority/Nodal Officer (N.O.) Officer may map single or multiple surveyors to that survey.

BR-SUR-003: One-Month Stale Detection

If no records are submitted at an assigned survey location within one month of assignment, the system shall flag the location and prompt the IA to raise a clarification with the Implementing Authority/Nodal Officer (N.O.) Officer.

BR-SUR-004: Two Week review SLA

Any records submitted by Surveyor should be reviewed within two weeks by IA or Implementing Authority/Nodal Officer (N.O.). If not then a tile should appear to review on immediate Basis (Immediate Review) and these records should also be viewed at central and super admin Level.

BR-CAP-001 to BR-CAP-004:

Mandatory geo-tagging, mandatory checkbox consent, live-photo only, CNCP Aadhaar fallback — carried forward from v2.0.

BR-LNG-001: Language Neutrality

Beneficiary responses are stored in language-neutral canonical form regardless of capture language.

17.2 Admin Panel & RBAC Rules

BR-RBAC-001: Single Source of Roles

Roles and permissions shall be defined exclusively in the Role and Permission sub-module of the SuperAdmin and consumed by all other modules.

BR-RBAC-002: User-Level Override

User-level permissions assigned via 'Assign Permission' shall take precedence over role-default permissions for that user only.

BR-RBAC-003: Territorial Scope

Every list and detail API call shall apply territorial scope filters based on the caller's role — state for SNO, district for DA, agency for IA-Web.

BR-RBAC-004: US/SO and NISD Scope

US/SO and NISD users shall have access to the Fund Management module only. The system shall reject any API call from these users to other modules.

BR-USR-001: No Hard Delete

User deletion shall be soft-delete; records are retained for audit and may be restored only by the SuperAdmin.

17.3 Fund Management Rules

BR-FUND-001: US/SO Owns Sanction Entry

Sanction-order entries shall be created exclusively by US/SO users.

BR-FUND-002: NISD Owns Release Entry

Release entries (NISD to State / UT) shall be created exclusively by NISD users; the 'Funds Received' and 'Date Received' fields auto-populate from the linked US/SO sanction entry.

BR-FUND-003: Implementing Authority/Nodal Officer (N.O.) Officer Owns Onward Release

Records the Fund Management as suggested in the form fields and submit the record.

BR-FUND-004: Sequential Workflow

A NISD release entry shall not be creatable without a prior matching US/SO sanction entry. A DA onward release entry shall not be creatable without a prior matching NISD release entry for the same district / installment.

BR-FUND-005: View-Only for Others

All non-editable stakeholders such as Super Admin, Central Ministry Users see Fund Management entries in read-only mode, scoped per their role.

17.4 Audit Rules

BR-AUDIT-001: Audit Trail Immutability

Audit log entries are append-only; no role (including SuperAdmin) shall be able to delete or modify them through the application UI.

18. Workflows & Process Models

18.1 Survey Lifecycle

- Implementing Authority/Nodal Officer (N.O.) Officer creates a survey on the web portal and assigns it to one or more Implementing Agencies.

- IA receives the survey on the mobile app dashboard and onboards / maps surveyors to the survey.
- Surveyor logs in, selects the survey, captures consent, geo-location, live photo, and questionnaire responses.
- Surveyor submits the record; if offline, it is queued and auto-synced on reconnect.
- Surveyor records at the end of each survey if the beneficiary will be mobilized at the time of Survey.
- IA reviews the record; accepts (forwards to Implementing Authority/Nodal Officer (N.O.) Officer) or raises clarification (returns to surveyor).
- Implementing Authority/Nodal Officer (N.O.) Officer reviews approved records on the web portal; approves, or raises clarification.
- On approval, the beneficiary enters the rehabilitation pipeline.

18.2 Fund Lifecycle

See Section 16.2 for the end-to-end fund lifecycle and Section 16.3 for the swimlane.

18.3 Rehabilitation Lifecycle

- Beneficiary identified through survey; record approved by Implementing Authority/Nodal Officer (N.O.) Officer.
- IA changes status to Under Mobilisation, then Mobilised on assignment to a shelter home (Section 6.3.1).
- Skill & Training enrolment is recorded by the IA (Section 8.11.1); details flow to the Comprehensive Rehabilitation — Skill and Training screen.
- Comprehensive Rehabilitation Data is captured per the SMILE Rehabilitation Data Format (Section 8.11.2) — Type of Rehabilitation, Wage / Self-Employment details, Convergence with Govt. schemes.
- 1 Year Follow-up status is updated; Active / Lost to Follow-up / Relapsed / Transferred / Deceased.

19. Risks, Assumptions & Constraints

19.1 Risks & Dependencies

- Dependency on BHASHINI API availability and translation accuracy.
- Dependency on SMS/OTP gateway delivery.
- Dependency on Implementing Authority/Nodal Officer (N.O.) Officer availability for timely IA approvals and survey creation.
- Risk of stakeholder onboarding delays for newly added roles (NISD, US/SO).

19.2 Assumptions & Constraints

- Survey creation is performed exclusively by the Implementing Authority/Nodal Officer (N.O.) Officer on the web portal.
- IA registrations require Implementing Authority/Nodal Officer (N.O.) Officer approval before activation.
- US/SO and NISD users are exclusively Fund Management users with no access to other sub-modules.

- Face authentication is explicitly out of scope; only live photo capture is required.
- Audio consent is explicitly out of scope; checkbox-based consent is sufficient.
- BHASHINI APIs will be accessible through approved Government channels with adequate quotas.
- Initial mobile release is Android-only (Android 8.0 and above).
- Actual fund disbursement is performed through PFMS / Government banking channels; the admin panel records reference numbers (sanction / UTR) only.

19. Dashboards and KPIs

Below are role-specific dashboards. Scope is enforced (system → state → district) so each role sees the same shape of insights, narrowed to what they own. KPI tiles, charts, and the India map are common layouts; what changes is the **data scope** and a few role-specific elements.

19.1. Super Admin Dashboard — System-wide

KPI Tiles (top row)

#	Tile	Value Shown	Click-through
1	Identified	Total beneficiaries identified across all states	→ 8.5.1 Person List (system-wide)
2	Rescued / Mobilised	Total beneficiaries with status = Mobilised	→ 8.5.2 Mobilisation List
3	Shelter Home Assigned	Total beneficiaries assigned to a shelter home	→ 8.5.3 Shelter Home (assigned filter)
4	Rehabilitation	Total beneficiaries with rehabilitation = Completed	→ 8.6.2 Rehabilitated Report
5	Total IAs Onboarded	Distinct active Implementing Agencies	→ 8.6.5 IA / Agency Report
6	Total Surveys Conducted	Distinct survey records submitted	→ 8.6.3 Beneficiary Report
7	Fund Disbursed	Sum of NISD release entries (₹)	→ 8.10 Fund Monitoring Tab 2
8	Fund Utilised	Sum of utilisation reported by IAs (₹)	→ 8.10 Fund Monitoring Tab 3

Demographic Breakdown (second row — donut / bar charts)

- **Gender-wise** — Donut: Male / Female / Transgender / Other.

- **Beneficiary Type-wise** — Donut: Adult / CNCP.
- **Age-wise** — Vertical bar: 0–6, 7–14, 15–18, 19–30, 31–45, 46–60, 60+.
- **Rehabilitation Type-wise** — Horizontal bar: Wage Employment / Self-Employment / Skill Training / Reunited with Family / Care Home / Child Welfare / Other.

Geographic Visualisation (centre — full width)

- **India Map (Choropleth) — State-wise Identification** — colour-graded heat map of all States/UTs by total beneficiaries identified. Hover tooltip per state shows: Identified, Mobilised, Shelter Assigned, Rehabilitated, Total IAs, Fund Disbursed (₹), Fund Utilised (₹).
- **Toggle on the same map**: switch between four metrics — Identified · Mobilised · Fund Disbursed · Fund Utilised.

Funds Section (third row — twin charts)

- **Fund Disbursed — State-wise** — horizontal bar chart, ranked top 10 states with "view all" expand.
- **Fund Utilised — State-wise** — horizontal bar chart, same scaling.
- **Disbursed vs Utilised — National** — paired bar (per state) showing utilisation gap.

Activity Feed (right rail or bottom)

- Latest 10 events — IA registrations pending approval, sanction orders awaiting NISD action, NISD releases awaiting DA acknowledgement, surveys breaching the one-month SLA.

Filters (global, top of dashboard)

- Date range · State · District · Beneficiary Type · Gender · Age band · Status.

19.2. Central Admin / Central Ministry Dashboard

Identical layout to Super Admin (system-wide scope), with two differences:

Differences vs Super Admin

Element	Super Admin	Central Admin
Action permitted from tiles	Drill-down & admin edits	Drill-down only (read-only)
Activity feed	System-wide incl. user / role events	Programme events only — IA approvals, fund flow, SLA breaches

KPI Tiles (top row)

Same eight tiles as Super Admin — Identified · Rescued/Mobilised · Shelter Home Assigned · Rehabilitation · Total IAs Onboarded · Total Surveys Conducted · Fund Disbursed · Fund Utilised.

Demographic Breakdown

Gender-wise · Beneficiary Type-wise · Age-wise · Rehabilitation Type-wise — system-wide.

Geographic Visualisation

India Map — State-wise heat map with toggleable metric (Identified / Mobilised / Fund Disbursed / Fund Utilised).

Funds Section

Fund Disbursed State-wise · Fund Utilised State-wise · Disbursed vs Utilised paired bar.

Additional Cross-state Insights (specific to Central Admin)

- **Top 5 / Bottom 5 States** — by identification, mobilisation rate, rehabilitation rate, and utilisation rate.
- **Pending Cross-state Approvals** — list of items routed to Central Admin for sign-off.

19.3. State Nodal Officer Dashboard — State-scoped

Same pattern as Super Admin, scoped to the SNO's State / UT. The India Map is replaced with a **State Map (district choropleth)**.

KPI Tiles

#	Tile	Value (scoped to State)
1	Identified	Total beneficiaries identified in the state
2	Rescued / Mobilised	Total mobilised in the state
3	Shelter Home Assigned	Total assigned to shelter homes in the state
4	Rehabilitation	Total rehabilitated in the state
5	Total IAs in State	Distinct active IAs operating in the state
6	Total Districts Covered	Districts with ≥ 1 survey
7	Fund Received (State)	Sum of NISD releases routed to the state
8	Fund Utilised (State)	Sum of utilisation reported by IAs in the state

Demographic Breakdown (state-scoped)

- Gender-wise · Beneficiary Type-wise (Adult / CNCP) · Age-wise · Rehabilitation Type-wise.

Geographic Visualisation

- **State Map — District Choropleth** — districts colour-graded by total beneficiaries identified. Tooltip per district: Identified, Mobilised, Shelter Assigned, Rehabilitated, IAs Active, Fund Allocated, Fund Utilised.
- **Map metric toggle:** Identified · Mobilised · Fund Allocated · Fund Utilised.

Funds Section (state-scoped)

- **Fund Received vs Utilised — District-wise** — paired bar across all districts in the state.
- **Top 5 / Bottom 5 Districts** by utilisation rate.

Activity Feed (state-scoped)

- IA registrations pending in the state, surveys breaching SLA in the state, recent fund releases received from NISD for the state.

Filters

- Date range · District · Beneficiary Type · Gender · Age band · Status.

19.4. Implementing Authority/Nodal Officer (N.O.) Officer Dashboard — District-scoped

Same pattern, scoped to the DA's District. The map is replaced with a **District / Survey-Location heat layer** (typically a list-based map of survey locations rather than a choropleth, since district sub-divisions are operational rather than statistical).

KPI Tiles

#	Tile	Value (scoped to District)
1	Identified	Total beneficiaries identified in the district
2	Rescued / Mobilised	Total mobilised in the district
3	Shelter Home Assigned	Total assigned to shelter homes in the district
4	Rehabilitation	Total rehabilitated in the district
5	Active IAs in District	Distinct active IAs
6	Active Survey Locations	Survey locations currently Open
7	Fund Received from NISD	Sum received in the district
8	Fund Released to IAs	Sum released by the Implementing Authority/Nodal Officer (N.O.) Officer to IAs

Demographic Breakdown (district-scoped)

- Gender-wise · Beneficiary Type-wise (Adult / CNCP) · Age-wise · Rehabilitation Type-wise.

Geographic / Operational Visualisation

- **Survey Locations Map** — pin markers for each survey location in the district, colour-coded by status (Open / Closed / Stale > 1 month). Tooltip per pin: location name, IA assigned, surveyors mapped, beneficiaries identified, last submission timestamp.
- **Survey Location Performance** — table-style list with sortable columns: location name, beneficiaries identified, mobilised, days open.

Operational Tiles (DA-specific second row)

#	Tile	Description
A	IA Registrations Pending Approval	Count + click-through to approval queue
B	Records Pending DA Review	Beneficiary records forwarded by IAs awaiting DA approval
C	Surveys Breaching 1-Month SLA	Locations open without submission for > 30 days
D	Clarifications Open	Clarifications raised by IAs awaiting DA response

Funds Section (district-scoped)

- **Funds Received from NISD vs Released to IAs** — paired bar.
- **Per-IA Release Status** — table: IA name, amount released, date released, acknowledgement status, UC submitted (Yes/No).

Activity Feed (district-scoped)

- Recent IA submissions, recent NISD releases received, IA registration approvals pending.

Filters

- Date range · Survey Location · IA · Beneficiary Type · Gender · Age band · Status.

Common Dashboard Behaviours (all four roles)

- **Refresh interval:** dashboards refresh every 5 minutes; manual refresh button available.
- **Date range default:** last 90 days, with quick presets (Today / This Week / This Month / This Quarter / This Year / Custom).
- **Drill-down:** every KPI tile and chart segment is clickable and routes to the underlying list in the relevant sub-module with the corresponding filter pre-applied.
- **Export:** each chart and table on the dashboard supports CSV and PDF export (respecting the active filters and territorial scope).
- **Empty state:** where no data exists for the selected scope, tiles display "0" and charts display a clear "No data for selected period / scope" placeholder rather than a blank panel.

- **Performance:** dashboards load within 3 seconds; map renders within 5 seconds for the default scope.

Quick Comparison — Scope at a Glance

Element	Super Admin	Central Admin	State Nodal Officer	Implementing Authority/Nodal Officer (N.O.) Officer
Geographic scope	All India	All India	One State / UT	One District
Geographic chart	India choropleth (state)	India choropleth (state)	State choropleth (district)	District map (survey locations)
KPI tiles count	8	8	8	8 + 4 operational
Edit / approve actions	Yes (system-wide)	Limited	State-scoped notifications only	District operational queue (approvals, reviews, clarifications)
Demographic charts	All four	All four	All four	All four
Fund view	Disbursed & Utilised state-wise	Disbursed & Utilised state-wise	Received & Utilised district-wise	Received from NISD & Released to IAs

21. Glossary / Key Abbreviations

Term	Description
BRD	Business Requirement Document
Implementing Authority/Nodal Officer (N.O.) Officer	Owner of survey creation, IA approval, record review, and onward fund release at the district level
IA	Implementing Agency — onboarded NGO/institution executing surveys
CNCP	Child in Need of Care and Protection (survey path for beneficiaries below 18)
BHASHINI	Government of India digital language translation platform
MoSJE	Ministry of Social Justice and Empowerment

Term	Description
NeGD	National e-Governance Division
NISD	National Institute of Social Defence
US/SO	Under Secretary / Section Officer — Fund Management editable role
SNO	State Nodal Officer
UC	Utilisation Certificate
UTR	Unique Transaction Reference (banking)
PFMS	Public Financial Management System
MoU	Memorandum of Understanding
OTP	One-Time Password
FCM	Firebase Cloud Messaging
RBAC	Role-Based Access Control
