

Audit 360 Report

Audit your website's UX, Performance, Accessibility, SEO, and more with AI

About UX4G

User Experience for Government Applications (UX4G) is an initiative under the Digital India Programme, by the Ministry of Electronics and Information Technology (MeitY), being implemented by National e-Governance Division (NeGD).

Key Products & Support by UX4G

UX4G Handbook

A comprehensive set of guides to uphold good UX/UI practices

[Learn More >](#)

UX4G Design System

A GIGW-compliant digital library of reusable components and a code repository simplifies Design & development.

[Learn More >](#)

Free Accessibility Widget

A plug-and-play widget ensures digital platforms are accessible to all users, meeting accessibility standards.

[Learn More >](#)

Audit 360 (Beta Version)

An automated UX audit tool to generate multi-page report on performance and compliance evaluations, ensuring best practices and accessibility standards.

[Learn More >](#)

Self UX Health Check : For Websites & Mobile Apps

A comprehensive tool for compliance/audit parameters on good UX/UI practices.

[Learn More >](#)

Capacity-Building Workshops

UX4G sensitizes officials to UI/UX, design thinking, and address challenges in creating effective online service experiences.

[Learn More >](#)

Advisory to Providers

- Adopt Design System by Designers and Developers
- Use UX Health Self Check tool (Manual UX Audit)
- Use Audit 360 Tool (AI based automated UX Audit)
- Deploy Accessibility Widget on Websites
- Adopt User Experience Handbook for Guidance on UX/UI enhancement
- Include the above usage in SoW/TOR of related Procurement Documents
- Deploy UX specific professionals for long-term improvement.
- Publish the link - www.ux4g.gov.in on the Portals

UX4G Compliances

UX4G Compliances will help you calculate the compliance rating of your website based on UX4G Parameters.

All UX4G Compliances: 69

● Marked as Compliant: 49

● Marked as Non-Compliant: 14

● Marked as Not Applicable: 6

Trust & Credibility

1. Has SSL encryption been implemented (indicated by https:// protocol in the URL)?

2. Is ownership information displayed on the webpage?

3. Has the webpage clearly provided contact details, including both an email address and a phone number? 

4. Are both the Privacy Policy and Terms and Conditions accessible on the website through clearly visible links or sections? 

5. Is the National Emblem displayed prominently on the webpage?

Mobile First Approach

1. Is the core content and primary functionality of the webpage easily accessible and usable on mobile devices without layout or usability issues?

2. Does the webpage adhere to WCAG accessibility standards to ensure readability of text and visual content?

Reason: Visible text sizing and contrast appear insufficient in multiple sections, and key WCAG requirements cannot be confirmed from the provided evidence.

Solution: Increase text size and contrast for small content areas, ensure semantic headings, verify keyboard navigation, add alt text to images/icons, and test against WCAG 2.1 AA.

3. Are branding elements such as logos, colours, and fonts consistently applied across all device types and screen sizes of the webpage?

Homepage

1. Does the webpage establish a clear visual hierarchy by arranging elements based on their importance?

2. Does the webpage layout follow recognized scanning patterns such as F-shaped or Z-shaped to guide navigation?

3. Are the most important tasks clearly highlighted on the webpage for easy identification and access?

4. Are branding elements such as logos, colours, and fonts consistently maintained on the webpage across all device types and screen sizes?

5. Does the webpage include a clearly visible 'Contact Us' link to provide easy access to support or communication channels?

6. Does the webpage clearly communicate the site's value proposition through a tagline or welcome message?

7. Does the webpage use a relevant and descriptive title that supports search engine visibility?

N/A

8. Are relevant keywords placed at the beginning of webpage link to enhance SEO and improve clarity?

9. Is organisational or departmental information grouped into a dedicated section such as "About Us"?

About Us

1. Is the purpose of the webpage page clearly define the understand of the organisation's mission, vision, and values?

Reason: The homepage does not visibly present mission, vision, and values in a clear, explicit manner.

Solution: Add concise mission, vision, and core values statements within the About Us section or link to a dedicated page from the homepage.

2. Does the webpage page provide a detailed overview of the organisation or entity behind the webpage?

Reason: Only a brief summary is visible; a detailed overview is not evident on the homepage.

Solution: Expand the About Us area or provide a clearly visible link to a detailed organizational overview page.

3. Are the core values of the organisation clearly outlined to convey the guiding principles behind its actions and decisions?

Reason: Core values are not clearly outlined on the visible page.

Solution: Include a short section listing the department's core values and guiding principles.

4. Does the webpage page include details about key leaders and their roles within the organisation?

5. Are significant achievements and milestones highlighted to showcase the organisation's track record and credibility?

Reason: Achievements and milestones are not explicitly highlighted as such on the homepage.

Solution: Add a dedicated achievements/milestones section with notable accomplishments, dates, and impact metrics.

6. Is a brief history of the organisation included to provide context about its origins and evolution?

Reason: A brief organizational history is not visible in the provided screenshots.

Solution: Include a concise history section or link to a dedicated history page from About Us.

Exploration Without Login

1. Is significant portion of the webpage content accessible without login, allowing to explore and understand the product offerings freely?

2. Is teaser content or a preview of premium features provided before sign up or log in for full access on the webpage?

Reason: The page does not show any preview of restricted or premium features before login/signup.

Solution: If gated services exist, show preview cards or explanatory snippets describing what additional features become available after login.

3. Is content organised into categories or equipped with filters to refine their exploration based on interests?

4. Are personalized content recommendations offered based on behavior or trends, even without a login based on location?

Reason: Personalized recommendations without login are not evident on the homepage.

Solution: Add optional location-aware or trending recommendation modules, clearly labeled and privacy-conscious.

5. Is content sharing enabled through external platforms or social media to allow wider distribution and engagement?

Login and Signup using National Single Sign-On

1. Are the SSO options such as MeriPehchan login and signup buttons placed prominently on the login screen to ensure easy access?

Reason: National SSO/MeriPehchan login is not visibly presented in the provided evidence.

Solution: Add a clearly labeled MeriPehchan login/signup option on the authentication interface and surface it prominently.

2. Is official MeriPehchan SSO branding, including logos, used consistently available?

Reason: Official MeriPehchan branding is not visible in the provided evidence.

Solution: Use official MeriPehchan branding and logo consistently on login/signup pages where SSO is offered.

Page Layout and Visual Design

1. Are clickable elements such as buttons clearly recognizable as interactive to enhance usability and reduce ambiguity?

2. Do non-clickable items avoid visual attributes that may falsely suggest interactivity, preventing user confusion?

3. Do buttons and controls have clear labels or design elements that indicate their intended function to support user interaction?

4. Are hyperlinked texts readily identifiable, such as through underlining or color, to ensure they can be easily located?

5. Are icons and graphics standard and intuitive-using commonly recognized symbols-to improve user comprehension?

6. Does webpage titles easily accessible and recognizable to support consistent navigation?

7. Is the same font style used throughout the webpage to maintain visual consistency? ✓

Search

1. Does placeholder text in the search bar guide on what can be searched for, such as 'Search products, categories, or brands'? N/A

2. Is the placeholder text kept clear and concise, avoiding jargon? N/A

3. Is it indicated if the search is global or local, with context-specific cues, like 'Search within this list'? ✗

Reason: No visible indication of search scope is evident from the screenshots.

Solution: Label the search clearly, e.g., 'Search this site' or 'Search within documents', depending on scope.

4. Does the search bar align with the overall theme and branding of the website? ✓

Personalisation

1. Are location-based services offered to provide relevant information based on geographic location? ✗

Reason: Location-based personalization is not evident in the provided screenshots.

Solution: Provide optional state/district-based service discovery or location-aware recommendations where relevant.

Task Orientation

1. Are scripts, applets, movies, audio files, graphics, and images not overused to prevent distraction? ✓

2. Are important and frequently used features positioned near the center of the page for quick access? ✓

3. Are buttons used for commands and actions instead of hyperlinked text to clarify functionality? ✓

4. Are sorting and filtering options provided for webpage with a lot of information to enhance usability? ✓

5. Is there a message before automatically logging off to avoid unintended interruptions? N/A

Navigation and Information Architecture

1. Are primary navigation elements (e.g., tabs, menu items) easily accessible and clearly labeled on the webpage? ✓

2. Are navigation elements placed in prominent locations, such as at the bottom or top of the webpage, where they can be easily reached? ✓

3. Are navigation elements large enough on the webpage to be clicked easily and are they accessible to those with disabilities? ✗

Reason: Some interactive elements appear too small for comfortable touch interaction and may not meet accessibility target-size guidance.

Solution: Increase tap target sizes to at least 44×44 px, add spacing between controls, and validate mobile accessibility.

4. Are related content and features grouped logically on the webpage to help understand where to find specific information? ✓

5. Is a consistent structure applied to similar sections and features, helping to develop a mental model of the webpage layout? ✓

Lists, Filters, and Sorting

1. Do all list items use consistent styling, including fonts, colors, and spacing, for a uniform look and feel? ✓

2. Are visual separators or dividers used between list items to enhance readability and distinguish between items on the webpage? ✓

3. Are list items easily clickable with sufficient spacing, preventing accidental taps and improving touch accuracy? ✗

Reason: Some list-related interactive elements appear too compact for reliable touch interaction on mobile.

Solution: Increase spacing between list items and enlarge touch targets for chips, tags, and card actions.

4. Are filters positioned in a prominent and easily accessible location, such as at the top of the list or in a fixed menu? ✓

Forms and Data Entry Checklist

1. Are forms concise, including only essential fields relevant to the task or data entry process? N/A

2. Are labels positioned prominently above or beside input fields, clearly indicating the type of information required? N/A

Writing and Content Quality Checklist

1. Is simple and direct language used to ensure that content is easy to understand, especially on smaller screens? ✓

2. Is content tailored to the webpage target audience, considering their language proficiency, cultural background, and preferences? ✓

3. Is a consistent brand voice maintained across all content, reflecting the webpage personality and values? ✓

4. Is the tone of voice adjusted based on the context and purpose of the content? ✓

5. Is content organized hierarchically with clear headings, subheadings, and bullet points to facilitate scanning and navigation? ✓

6. Is important information highlighted prominently, ensuring that critical details stand out? ✓

7. Is grammatical correctness ensured in all written content to enhance professionalism and credibility? ✓

8. Is content reviewed for spelling errors, typos, and punctuation mistakes before publication to maintain quality standards? ✓

9. Is the content on the webpage broken into smaller paragraphs with whitespace utilized for readability, avoiding dense blocks of text? ✓

Help, Feedback, and Error Tolerance Checklist

1. Does the webpage provide options to contact customer support directly via email, chat, or phone for more complex issues? ✓

UI/UX Guidelines (GIGW)

GIGW Compliances evaluate your website's adherence to Indian Government UI/UX guidelines.

All GIGW Compliances: 20

● Marked as Compliant: 13

● Marked as Non-Compliant: 5

● Marked as Not Applicable: 2

Scalability and Future Proofing

1. Your webpage must be scalable for new features and services.

User Journey Mapping

1. Your webpage should emphasis on simple, progressive journeys for citizens (Application → Status → Outcome).

Reason: A progressive service journey is not explicitly presented on the homepage for citizens to move from applying to tracking to receiving outcomes.

Solution: Add prominent journey-based CTAs such as 'Apply for Scheme', 'Track Application Status', and 'View Benefit/Outcome' grouped together near the top of the homepage.

Navigation Simplicity

1. Your webpage should be minimal, clean, top-level navigation preferred (max 2-3 clicks to important sections).

Information Architecture (IA)

1. Your webpage should have a logical, hierarchical content structure that is easy to browse.

Search Functionality

1. Your webpage must include a visible and easy-to-use search functionality.

Mobile-First and Responsive Design

1. Your webpage should use responsive design to support mobile, tablet, and desktop devices.

Accessibility Focus

1. Your webpage should meet basic accessibility standards aligned with WCAG 2.0/2.1 guidelines.

Consistent Iconography and Imagery

1. Your webpage Icons and images must aid navigation and not confuse users.

Content Simplicity

1. Your webpage should use simple, jargon-free, and citizen-friendly language.	✗
Reason: The homepage mixes citizen-facing content with bureaucratic terminology that reduces plain-language clarity.	
Solution: Rewrite key headings and summaries in simpler citizen language, and add short explanatory text/tooltips for abbreviations and institutional terms.	

Multilingual Support

1. Your webpage should strongly encourage the use of Hindi, English, and regional languages.	✗
Reason: No multilingual controls or alternate language options are visible on the page despite the requirement for Hindi/English/regional support.	
Solution: Add a prominent language selector in the header offering at least Hindi and English, with support for relevant regional languages.	

Form Design and Progressive Disclosure

1. Your webpage should use simple, step-by-step forms to avoid user fatigue and minimize the number of fields initially.	N/A
--	-----

Feedback Mechanisms (Chat, Contact)

1. Your webpage must provide an easy way for users to ask for help or provide feedback.	✓
---	---

Color Palette

1. Your webpage should use simple, neutral backgrounds that emphasize usability over bright colors.	✓
---	---

Header and Footer Structure

1. Your webpage footer should include fixed items: Home, About Us, Contact, Feedback, and Sitemap.	✗
Reason: The required fixed footer set is incomplete in the visible footer.	
Solution: Add explicit footer links for Home, About Us, Contact, Feedback, and Sitemap in a consistent fixed footer section.	

Typography

1. Your webpage should use clear, easy-to-read fonts and avoid decorative styles.	✓
---	---

Performance Optimization

1. Your webpage must load within 2–3 seconds, even on mobile networks.	N/A
--	-----

 www.ux4g.gov.in  support.ux4g@digitalindia.gov.in

Language Support for Accessibility

1. Your webpage must include mandatory regional language support to accommodate India's diversity. ✗

Reason: Regional language accessibility support is not visibly present on the homepage.

Solution: Provide a language switcher with Hindi and relevant regional languages, and ensure key citizen services/pages are translated.

Clear CTAs (Call-to-Actions)

1. Action buttons on your webpage must be prominently visible and clearly descriptive. ✓

Logo Usage

1. Your webpage should correctly use the Indian Government Emblem alongside project branding. ✓

Secure Connections (HTTPS Mandatory)

1. Your webpage must use HTTPS, as it is non-negotiable for all government websites. ✓

Performance

DIAGNOSTICS

▲ Largest Contentful Paint element — **3,180 ms**

▲ Serve images in next-gen formats — **Potential savings of 3,724 KiB**

▲ Reduce initial server response time — **Root document took 1,600 ms**

▲ Properly size images — **Potential savings of 3,539 KiB**

▲ Efficiently encode images — Potential savings of 812 KiB	▼
▲ Reduce unused CSS — Potential savings of 58 KiB	▼
▲ Reduce unused JavaScript — Potential savings of 787 KiB	▼
▲ Eliminate render-blocking resources — Potential savings of 140 ms	▼
▲ Avoid an excessive DOM size — 3,170 elements	▼
▲ Minimize main-thread work — 2.3 s	▼
■ Image elements do not have explicit width and height	▼
■ Minify CSS — Potential savings of 15 KiB	▼
■ Minify JavaScript — Potential savings of 78 KiB	▼
■ Enable text compression — Potential savings of 187 KiB	▼
■ Serve static assets with an efficient cache policy — 154 resources found	▼
■ Ensure text remains visible during webfont load	▼
Warnings: Lighthouse was unable to automatically check the `font-display` values for the origin https://cdngovai.myscheme.in .	
■ Defer offscreen images — Potential savings of 68 KiB	▼
■ Avoid serving legacy JavaScript to modern browsers — Potential savings of 30 KiB	▼
■ Avoid enormous network payloads — Total size was 9,238 KiB	▼
○ Avoid large layout shifts — 3 layout shifts found	▼
○ Avoid long main-thread tasks — 4 long tasks found	▼
○ Avoid non-composited animations — 9 animated elements found	▼
○ Avoid chaining critical requests — 77 chains found	▼
○ JavaScript execution time — 0.6 s	▼
○ Minimize third-party usage — Third-party code blocked the main thread for 0 ms	▼

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ARIA

▲ [button](#), [link](#), and [menuitem](#) elements do not have accessible names.

○ ARIA IDs are unique

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

▲ Some elements have a `[tabindex]` value greater than 0

▲ Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

BEST PRACTICES

▲ Touch targets do not have sufficient size or spacing.

These items highlight common accessibility best practices.

by UX4G

DISCLAIMER

The compliance report is advisory in nature, and it is developed to help the product team in getting faster UX Audit results and related solutions for better user engagement and satisfaction of a digital platform.

This report has been generated in whole or in part using artificial intelligence (AI) technologies. Results are based on the AI prompts. All users of this report are responsible for independently verifying the information and assessing its suitability for their purposes. Critical data points, statistics, and recommendations should be cross-referenced with manual checks.

The members may also like to conduct the comprehensive UX Audit using [Self UX Health Check Tool](#) applying manual clicks for more accuracy.
