

DESIGN SUGGESTIONS — FOR THE DESIGN TEAM

MoSJE Website — dosje.gov.in · Design-side Recommendations

Separate from the dev fidelity report: token decisions, Figma frame updates, and screens that exist live but have no design yet. 2026-09-18

This report is for the design team and is separate from the developers' QC report. It lists what must change in the Figma handoff file itself: colour and type decisions the design gets wrong on its own, frames and states that were never drawn, live views with no design, and the UI/UX changes the dev audit shows are needed. Every figure is measured — design contrast on the exported frame pixels, live findings on the captured page — and every board is marked on the element in question.

1 The design draws #0373DF text on #EBF3FB — 4.15:1, below AA

National e-Governance Division

Digital India Corporation

OBSERVED

Measured on the exported frame: the text colour the design sets (#0373DF) against the ground it is drawn on (#EBF3FB) is 4.15:1 at 16px, where WCAG 2.2 AA needs 4.5:1. The pair occurs in 157 distinct text styles across 55 frame(s), including About Us, Annual Reports, Annual Reports-Filter Applied, Back to top. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

Change the text colour style from #0373DF to #014B92 (the site's dark blue (footer strip)) — 7.74:1 on #EBF3FB; or keep #0373DF and lighten the ground from #EBF3FB to #F9FCFE (4.5:1). Make the change in the colour STYLE, not frame by frame, so all 55 frames update together; the build follows the design, so the live site is fixed by the same decision.

#E2E6EA on #0373DF = 3.7:1 at 11px · needs 4.5:1

Shastri Bhawan, New Delhi - 110001

011-23381691

secy.sje@gov.in

OBSERVED

Measured on the exported frame: the text colour the design sets (#E2E6EA) against the ground it is drawn on (#0373DF) is 3.7:1 at 11px, where WCAG 2.2 AA needs 4.5:1. The pair occurs in 68 distinct text styles across 15 frame(s), including CPIO, Contact Us/MoSJE, Contact Us/NCSC, Documents/Annual Reports. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

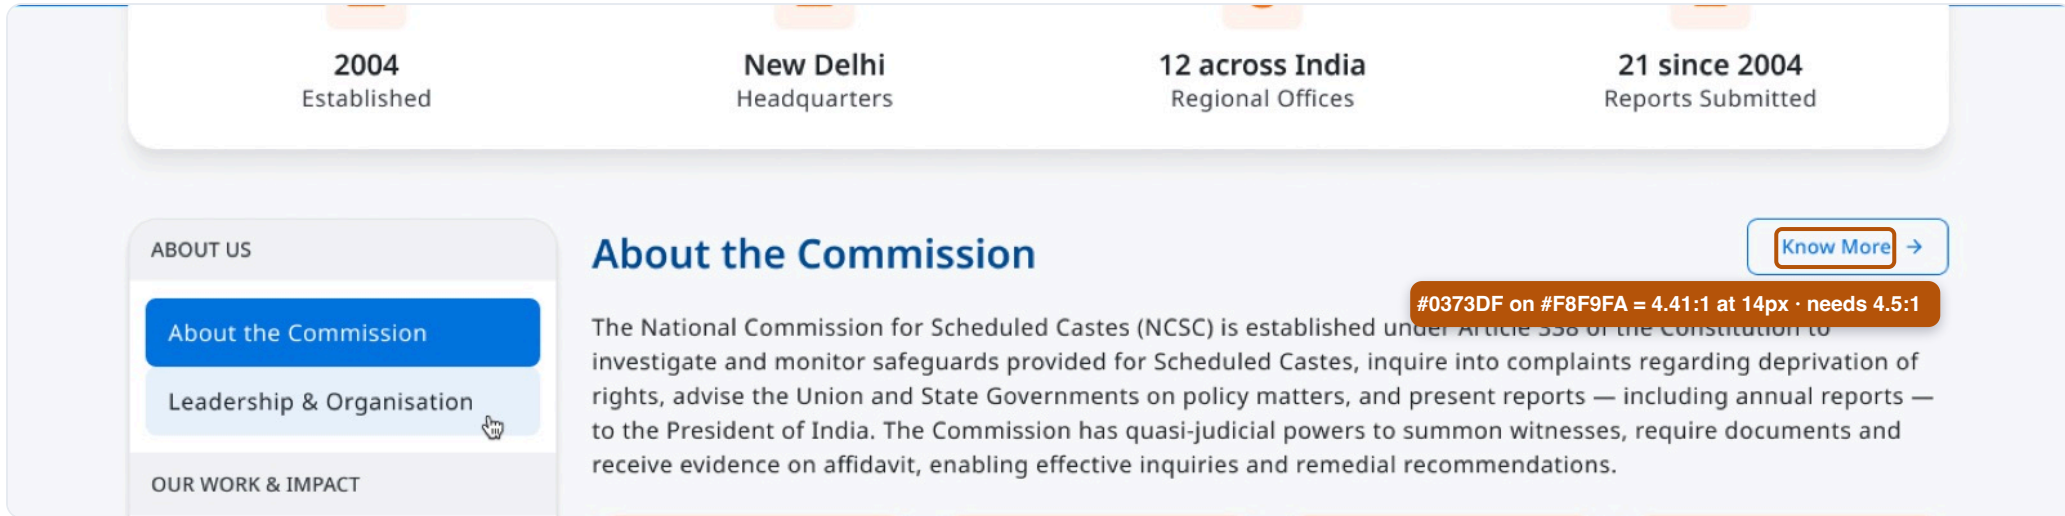

Keep #E2E6EA and darken the ground from #0373DF to #0365C4 (4.56:1); or change the text colour style from #E2E6EA to #FFFFFF (the site's white) — 4.64:1 on #0373DF. Make the change in the colour STYLE, not frame by frame, so all 15 frames update together; the build follows the design, so the live site is fixed by the same decision.

3 The design draws #0373DF text on #F8F9FA — 4.41:1, below AA

[Decide](#)

DES-A-03

DESIGN — current Figma

OBSERVED

Measured on the exported frame: the text colour the design sets (#0373DF) against the ground it is drawn on (#F8F9FA) is 4.41:1 at 14px, where WCAG 2.2 AA needs 4.5:1. The pair occurs in 38 distinct text styles across 13 frame(s), including Annual Reports, CPIO, Contact Us/NCSC, Documents/Annual Reports. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

Change the text colour style from #0373DF to #014B92 (the site's dark blue (footer strip)) — 8.22:1 on #F8F9FA; or keep #0373DF and lighten the ground from #F8F9FA to #FBFBFC (4.5:1). Make the change in the colour STYLE, not frame by frame, so all 13 frames update together; the build follows the design, so the live site is fixed by the same decision.

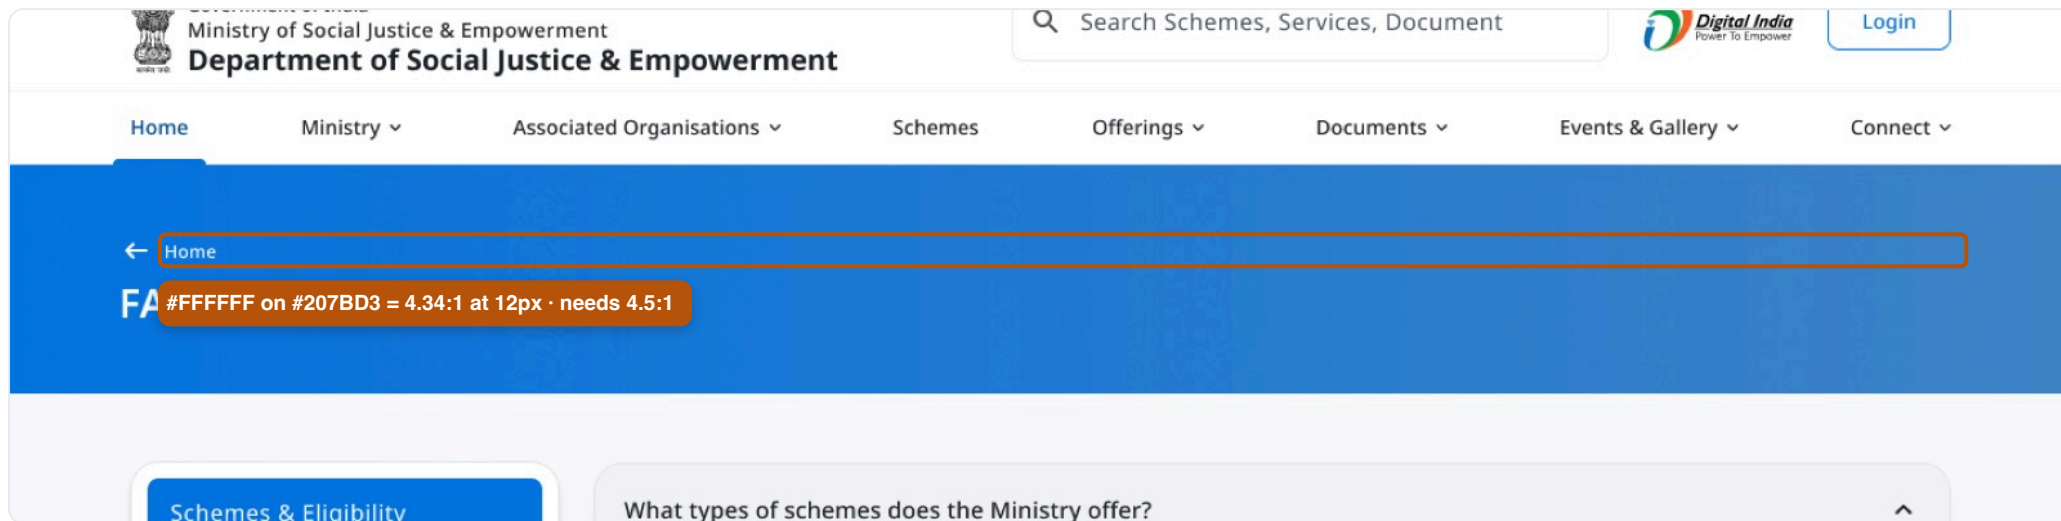

[Open in Figma](#)

4 The design draws #FFFFFF text on #207BD3 — 4.34:1, below AA

Decide

DES-A-04

DESIGN — current Figma

OBSERVED

Measured on the exported frame: the text colour the design sets (#FFFFFF) against the ground it is drawn on (#207BD3) is 4.34:1 at 12px, where WCAG 2.2 AA needs 4.5:1. The pair occurs in 14 distinct text styles across 5 frame(s), including FAQs, No Result Found, Policies, Search Result. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

Keep #FFFFFF and darken the ground from #207BD3 to #1F79CF (4.5:1); or change the text colour style from #FFFFFF to #0A0A0A — 4.55:1 on #207BD3. Make the change in the colour STYLE, not frame by frame, so all 5 frames update together; the build follows the design, so the live site is fixed by the same decision.

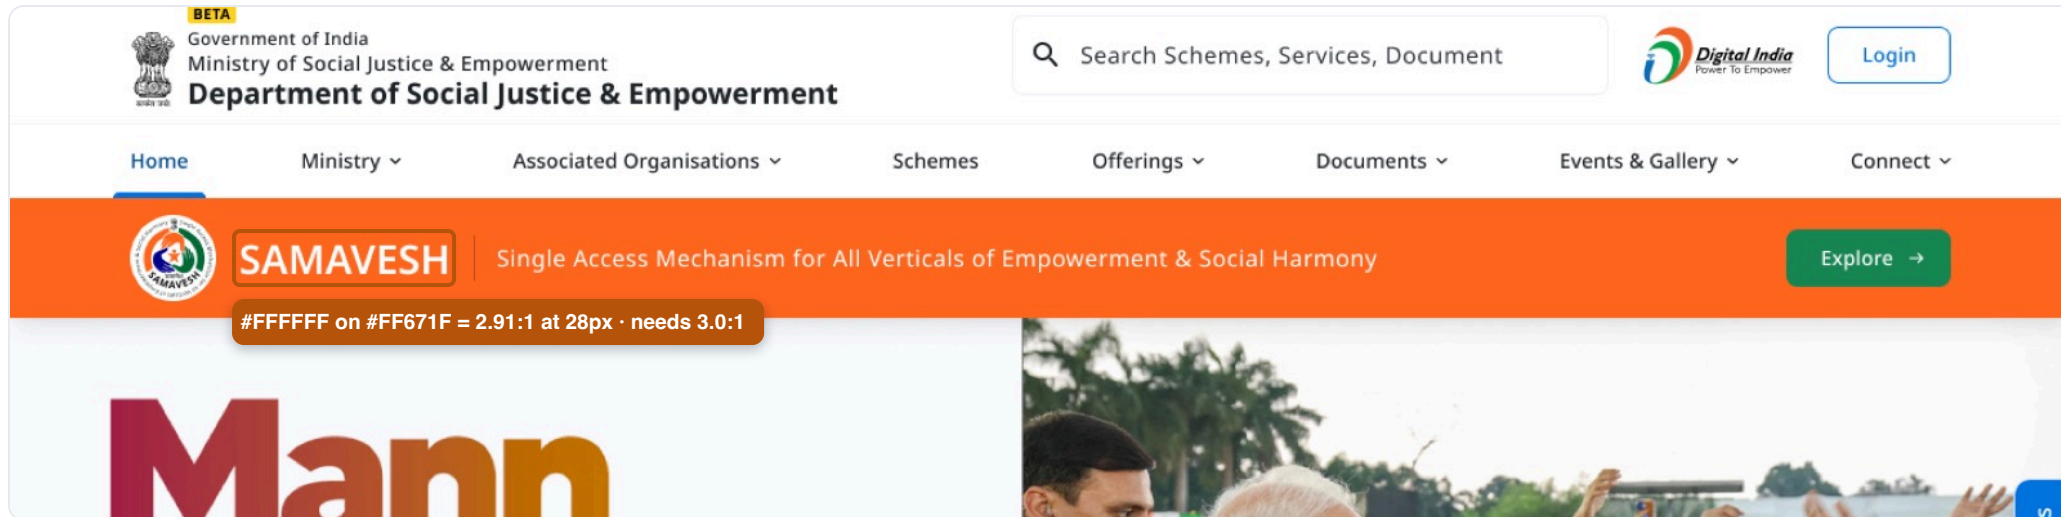

[Open in Figma](#)

5 The design draws #FFFFFF text on #FF671F — 2.91:1, below AA

Decide

DES-A-05

DESIGN — current Figma

OBSERVED

Measured on the exported frame: the text colour the design sets (#FFFFFF) against the ground it is drawn on (#FF671F) is 2.91:1 at 28px, where WCAG 2.2 AA needs 3.0:1. The pair occurs in 12 distinct text styles across 4 frame(s), including Home, Home -> SAMAVESH Explore, Home -> SAMAVESH Login (Citizen), Organisation Details. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

Keep #FFFFFF and darken the ground from #FF671F to #FA651E (3.03:1); or change the text colour style from #FFFFFF to #374151 (the site's secondary text colour) — 3.54:1 on #FF671F. Make the change in the colour STYLE, not frame by frame, so all 4 frames update together; the build follows the design, so the live site is fixed by the same decision.

OBSERVED

Measured on the exported frame: the text colour the design sets (#FFFFFF) against the ground it is drawn on (#EC5042) is 3.63:1 at 12px, where WCAG 2.2 AA needs 4.5:1. The pair occurs in 10 distinct text styles across 5 frame(s), including Events, Events & Gallery/Gallery -> Photo and Video, Events List, Home. The build copies the design, so the live site fails in the same place.

RECOMMENDATION

Keep #FFFFFF and darken the ground from #EC5042 to #D0463A (4.55:1); or change the text colour style from #FFFFFF to #1F1F1F — 4.57:1 on #EC5042. Make the change in the colour STYLE, not frame by frame, so all 5 frames update together; the build follows the design, so the live site is fixed by the same decision.

[Open in Figma ↗](#)

7 516 text layers use a typeface other than Noto Sans

Decide

DES-A-10

OBSERVED

Across the 251 exported handoff frames, 410 layers are set in Roboto, 87 layers are set in Inter, 12 layers are set in Poppins, 7 layers are set in Druk Wide Trial. Noto Sans is the standard across Government of India properties and the estate's only typeface.

- Roboto: 410 layers in About Us, Annual Reports, Annual Reports-Filter Applied, Back to top, Biographical Sketch Bottom Sheet, CPIO and 72 more frames
- Inter: 87 layers in Home, Index Page, Organisation Details, Organisation Details / Construction & Repair of Hostels, Organisation Details / Development of SC dominated villages into “Adarsh Gram”, Organisation Details / Grants-in-aid to State/Districts
- Poppins: 12 layers in Documents/Annual Report -> Quick View, Side Sheet Container
- Druk Wide Trial: 7 layers in Organisation Details, Organisation Details -> State Offices

RECOMMENDATION

In each frame listed, select the text (Figma: Edit → Select all with same font) and apply the matching Noto Sans text style from the SAMAVESH library; Druk Wide and Poppins have no place in a Government of India page.

OBSERVED

UX4G 3.0 names 12px (Body/XS) as the minimum usable size. 1325 text layers in the handoff frames are below it — for example “BETA” at 10px in Events; “Government of India” at 11px in Events; “BETA” at 10px in Who’s Who -> MoSJE; “Government of India” at 11px in Who’s Who -> MoSJE. 79 frames are affected.

- Organisation Details: 149 layers
- Home: 102 layers
- Home/Dashboard: 89 layers
- Events & Gallery/Gallery -> News: 76 layers
- Latest Updates: 52 layers
- Events & Gallery/Gallery -> Photo and Video: 43 layers
- Search result: 40 layers
- Ministry/Directory: 40 layers

RECOMMENDATION

Raise every layer below 12px to Body/XS (12px / 16px line height) — in practice the masthead lineage text (“Government of India”, 11px), the BETA badge (10px) and card meta lines. Fix it in the text styles those layers use, so all frames update.

OBSERVED

The UX4G scale is 12/14/16/18/20/24/28/32/36/40/52/60. The design also uses 11px (842x), 10px (342x), 48px (168x), 22px (129x), 8px (125x), 13px (32x), 17px (18x), 56px (16x).

- 11px (842 layers) → 12px Body/XS
- 10px (342 layers) → 12px Body/XS
- 48px (168 layers) → 52px Display/M
- 22px (129 layers) → 24px Heading/M
- 8px (125 layers) → 12px Body/XS
- 13px (32 layers) → 14px Body/S
- 17px (18 layers) → 18px Body/L
- 56px (16 layers) → 60px Display/L
- 9px (16 layers) → 12px Body/XS
- 15px (13 layers) → 16px Body/M

RECOMMENDATION

Re-point each off-scale text style to the step shown, in the SAMAVESH text styles, so the values developers read from the handoff are always on the UX4G scale.

10 Two Home designs, and two Schemes & Services designs — which is current?

Decide

DES-A-13

OBSERVED

The  UI Flow page carries a Home frame (3453:7805) and the Home page carries a newer, taller one (51821:33657); they differ. The Offerings page carries a 'Scheme Discovery — Finalised for Handoff (Review of 14 September)' section whose read-me says it replaces Schemes & Services, while the  flow still shows the older one. This audit compared the build against the newer Home and against Scheme Discovery.

RECOMMENDATION

Decide which is current and move the other to the Archive page: Home — keep 51821:33657 (newer) or 3453:7805 ( flow); Schemes & Services — adopt Scheme Discovery and archive the  flow version, as its read-me proposes. Then relink the  UI Flow page to the chosen frames.

11 Interaction and data states are almost entirely undrawn

Design

DES-B-01

OBSERVED

Of the handoff frames, the number whose name shows each state: focus 0, hover 0, disabled 0, empty 0, error 2, loading 0, skeleton 0, validation 0, 404 0, no result 3. No frame shows focus, hover, disabled, empty, loading, skeleton, validation, 404. On the live site, of 1640 keyboard stops measured on 20 pages, 26 change nothing at all when focused and 16 change only a digit's colour — the pagination and the hero banner, the controls the design never drew a focus state for.

- Focus: every button, link, input, pagination item, card link and carousel control — 2px #0373DF outline, 2px offset; current-page and focus must look different
- Hover and Disabled: Button (all variants), Link, Pagination, Chip, Tab
- Listing states for Documents, Tenders, Vacancies, Events, Gallery and the directories: Loading (skeleton rows), Empty (“No documents published yet”), Filtered to nothing (names the filter + Clear filters), Error (with Try again)
- Form validation: Contact / Feedback form with field errors and a summary at the top
- 404 page and Search — no results

RECOMMENDATION

Draw each as a variant on the SAMAVESH component (not per page), then place one example of each listing state on the Documents page of the handoff, so developers have a frame to build and QC has a frame to check against.

12 The DBIM-compliant screens exist at desktop width only (8 frames, 0 phone)

Design

DES-B-02

OBSERVED

Every section of the  UI Flow pages carries phone frames. The DBIM page does not: it holds the newest, DBIM-compliant versions of these screens, and none has a 375px version, so the phone build still follows the earlier, non-compliant design.

- Gallery -> News
- Gallery -> Photo and Video
- Home
- Home -> for Researcher
- Ministry/About Us
- Ministry/Directory
- Ministry/Directory -> MoSJE, Joint Secretary
- Ministry/Who's Who

RECOMMENDATION

Draw the 375px version of each DBIM frame from the same components, then retire the superseded phone frames in the  flow.

13 The DBIM-compliant footer exists on the DBIM page only

Design

DES-B-03

OBSERVED

Only 5 of 251 frames carry a footer with Related Links and Website Policy — all on the DBIM page. Every  UI Flow frame still uses the earlier footer, which lacks the four sections DBIM 5.6 mandates (Archives, Website Policy, Related Links, Feedback). The live footer follows the  flow, and fails DBIM 5.6 on every page.

RECOMMENDATION

Make the DBIM page's footer the one Footer component (Archives, Website Policy, Related Links, Feedback, plus the existing lineage and policy row), swap it into every  UI Flow frame (Figma: select the old footer instances → Swap instance), and delete the old footer master so it cannot come back.

14 24 live pages were built with no design frame

Propose

DES-C-01

OBSERVED

These pages are published on dosje.gov.in and have no frame in the handoff file; developers built them without a design to follow, and QC has nothing to check them against.

- /footer-carousel/ → utility page (confirm it should be public)
- /miscellaneous/ → Document register
- /meta-data/ → utility page (confirm it should be public)
- /guidelines-for-assisting-ngos-voluntary-organisations/ → Document register
- /visitor-analytics/ → utility page (confirm it should be public)
- /official-language-act/ → Content page
- /updates/ → Content page
- /about-the-division-social-defence/ → Document register
- /chairpersons-office/ → Content page
- /about-the-division-statistics-division/ → Document register
- /about-the-division-2/ → Content page
- /activities-of-the-ministry-official-language/ → Content page
- /official-language-background/ → Content page
- /organisation-under-division-social-division/ → Content page
- /drug-division/ → Content page
- /welfare-of-the-other-backward-classes/ → Content page
- /cessation-of-voluntary-organisation-activities/ → Content page
- /penalties-in-case-of-misutilization-of-grands/ → Content page
- /inspection-and-monitoring-procedure/ → Content page
- /contact-person/ → Content page
- /procedure-for-processing-grant-in-aid-cases-in-respect-of-voluntary-organisations/ → Content page
- /prioritization-guidelines-for-funding-projects-by-voluntary-organisations/ → Content page
- /about-the-division-welfare-of-the-other-backward-classes/ → Content page
- /about-the-division/ → Content page

RECOMMENDATION

Design two templates and assign every page above to one of them (assignment shown beside each page, from what the live page contains): a Content page (title, standfirst, body, attached documents, last-updated) and a Document register (filters, table with Download/View, paging, empty and filtered-to-nothing states). Pages marked 'utility' are WordPress helper pages the Department should confirm are meant to be public.

15 10 record detail templates have no design

Propose

DES-C-02

OBSERVED

The live site publishes a detail page for each record of these types, with no frame.

- cpio — e.g. /cpio/shri-sumit-kumar/
- cpio — e.g. /cpio/shri-vinesh-pachnanda/
- suo-moto-disclosure — e.g. /suo-moto-disclosure/list-of-schemes-projects-programme-underway-in-nisd/
- suo-moto-disclosure — e.g. /suo-moto-disclosure/security-audit-certificate/
- tender — e.g. /tender/investment-of-an-amount-of-rs-10-00-crore-in-fixed-reg-2/
- tender — e.g. /tender/investment-of-an-amount-of-rs-174-00-crore-in-fixed-reg/
- updates — e.g. /updates/3rd-national-lok-adalat-awareness-material-2026/
- updates — e.g. /updates/pre-bid-meeting-tender-id-gem-2026-b-7743923/
- vacancies — e.g. /vacancies/short-term-internship-programme-at-daic-september-2026/
- vacancies — e.g. /vacancies/short-term-internship-programme-at-dr-ambedkar-international-centre-15-janpath-new-delhi-110001-3/

RECOMMENDATION

Design one Record detail template — breadcrumb, title, a meta row (organisation, date, size), body, attachments with Download/View, related records — with a variant per type: Document, Tender, Vacancy, Event, Gallery album, Official (profile card), CPIO, Venue booking, Update, Suo-moto disclosure.

Tab stop 73 · nothing changes on focus · WCAG 2.4.7 FAIL

Need Support?

Reach out to us and we will get back to you!

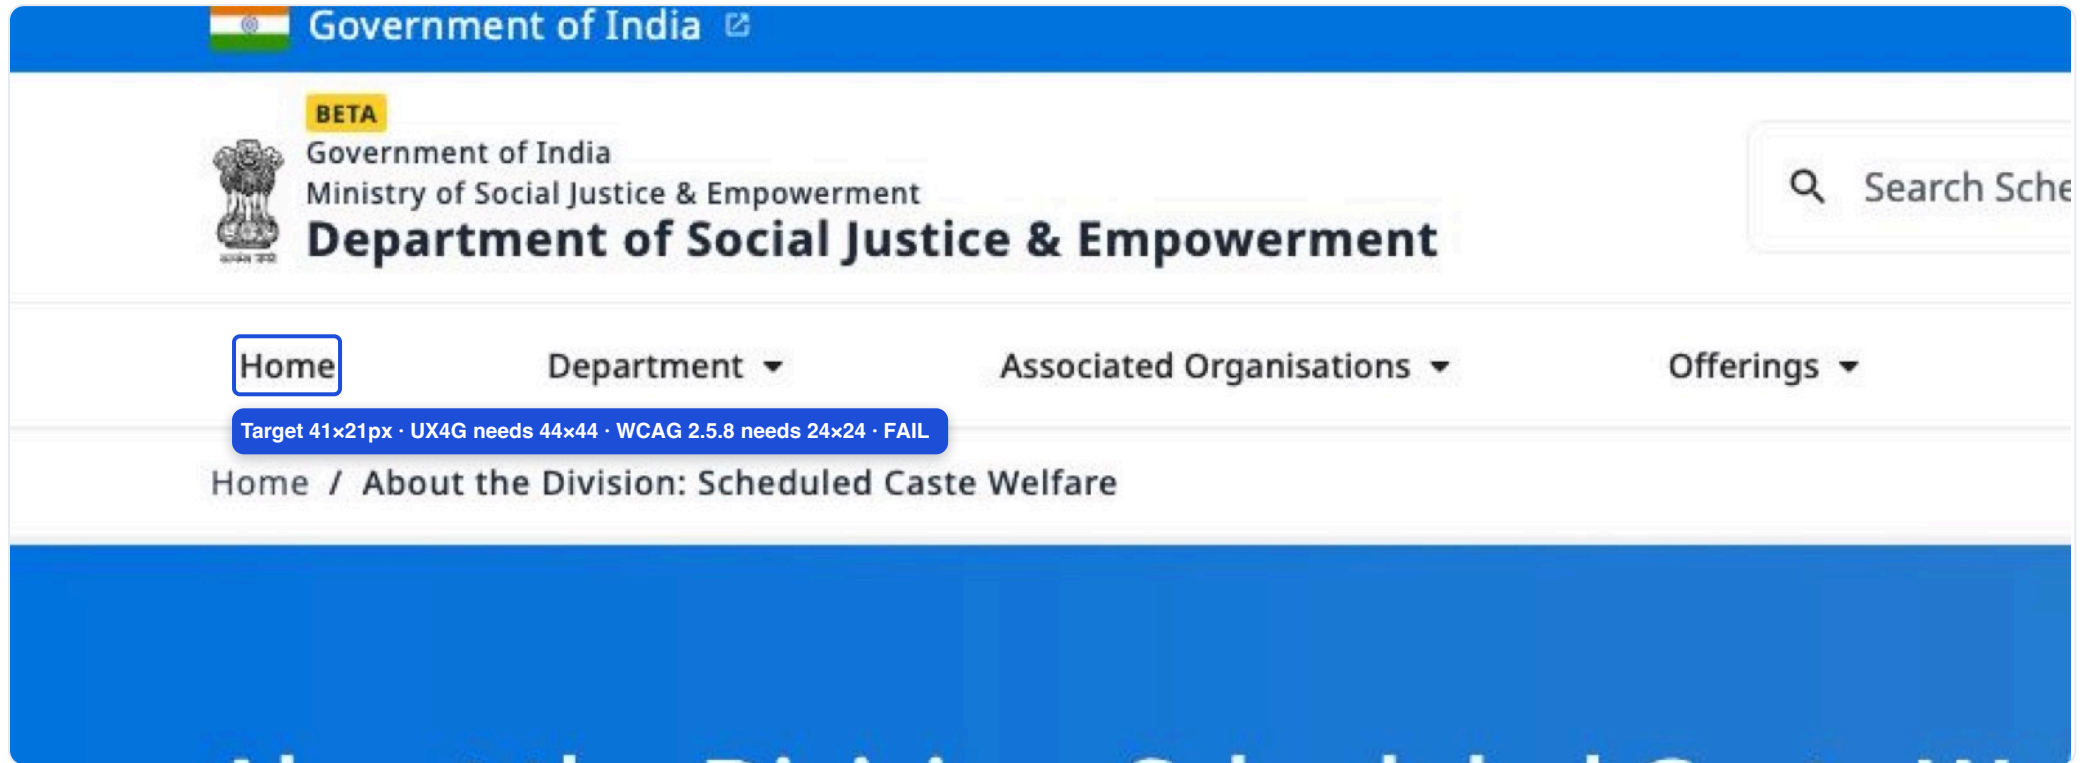

OBSERVED

Pagination page numbers: screenshotted focused and then blurred, no pixel changes, so a keyboard user cannot see where focus is. Measured on 9 pages. (Dev report WEB-GLOBAL-086.)

RECOMMENDATION

Add a Focus variant to the Pagination component (page numbers and previous/next) and to the hero carousel slide: 2px #0373DF outline at 2px offset. Give the current page a style that is NOT the focus style (e.g. filled chip), so the two can be told apart.

LIVE — current build

**OBSERVED**

“Home” is 41x21px. UX4G 3.0 §6 sets 44x44px as the minimum interactive size; at 41x21 it is also below the WCAG 2.5.8 AA floor of 24x24. Measured on 146 pages. (Dev report WEB-GLOBAL-111.)

RECOMMENDATION

In the Navbar, Footer and document-card components, set each link's hit area to 44px tall (20px text + 12px vertical padding) with 8px between neighbours. Keep the text size; only the target grows.

LIVE — current build

OBSERVED

DBIM 5.6 mandates four footer sections. This footer publishes 0 of them; missing: Archives, Website Policy, Related Links, Feedback. Measured on 146 pages. (Dev report WEB-GLOBAL-045.)

RECOMMENDATION

Use the DBIM page's footer (Archives, Website Policy, Related Links, Feedback) as the only Footer component and swap it into all  UI Flow frames.

LIVE — current build

Need Support?

<h1> → <h6> · skips h2

us and we will get back to you!

Government of India
Ministry of Social Justice & Empowerment

Department

Services

Support

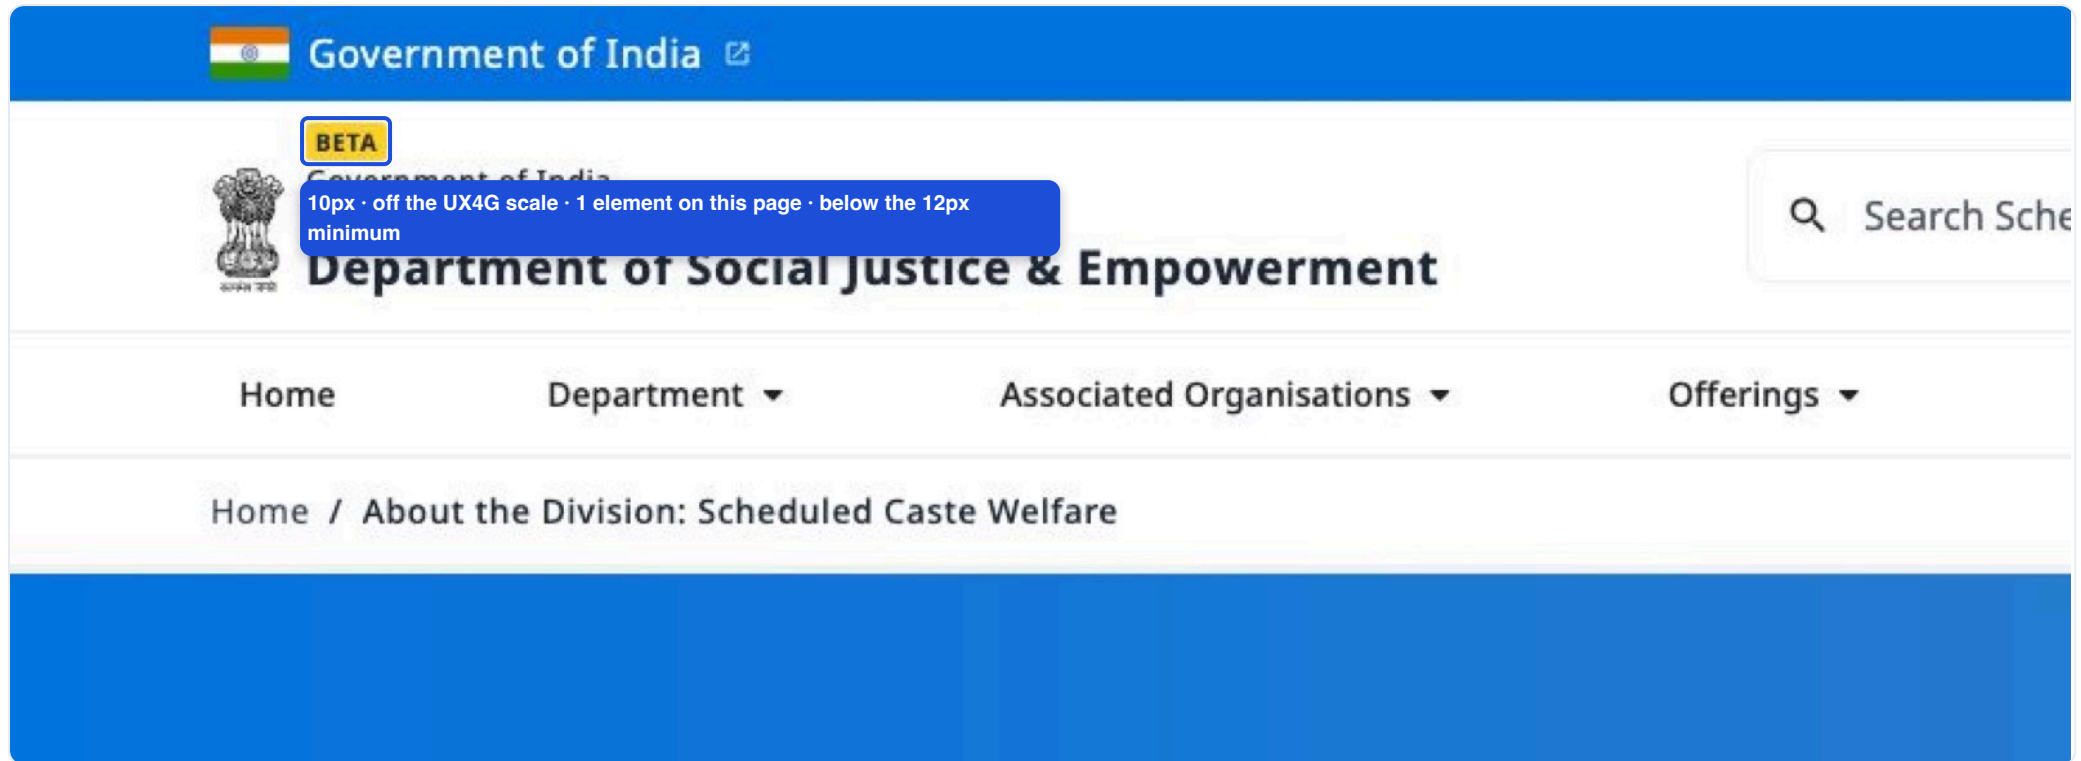

OBSERVED

“Need Support?” is an <h6> directly after an <h1>, skipping h2. The outline cannot be navigated reliably by a screen reader. Measured on 138 pages. (Dev report WEB-GLOBAL-025.)

RECOMMENDATION

Label each heading on the handoff with its level — page title H1, section titles H2 (including the “Need Support?” band), card titles H3 — so the build does not pick tags by size.

LIVE — current build

**OBSERVED**

1 element(s) render at 10px, which is not on the UX4G type scale (12/14/16/18/20/24/28/32/36/40/52/60). It is also below Body/XS, the stated minimum usable size. Measured on 130 pages. (Dev report WEB-GLOBAL-063.)

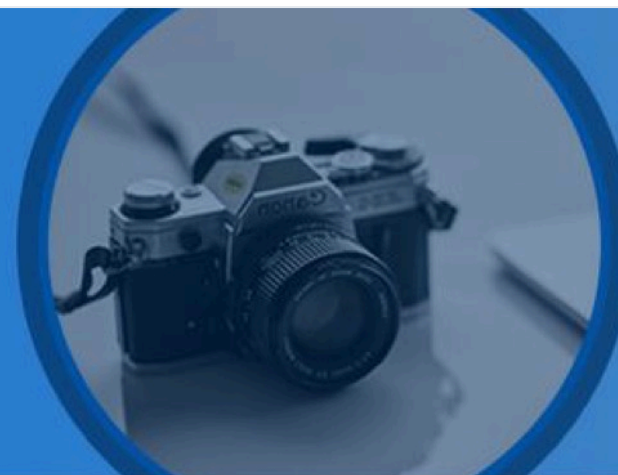

RECOMMENDATION

Remove the 8/10/11/13/15px styles from the file; use 12/14/16px (Body/XS, S, M). The live 8–11px text comes from these styles.

Senior Citizens Welfare(SCW) • 02/09/2026

“Ek Ped Maa Ke Naam”

Senior Citizens Welfare(SCW) • 01/09/2026

“Ek Ped Maa Ke Naam”

OBSERVED

Under the Gallery page's <h1>, the standfirst reads “Review comprehensive annual reports released by the Commission and its associated organisations.” That is the Annual Reports page's description, and it also says “the Commission” on a Department page. It is the first sentence a citizen reads on the page. (Dev report WEB-SCREEN-293.)

RECOMMENDATION

Provide the standfirst for every listing page in the design (the live Gallery page shows the Annual Reports description; the four audience pages share one sentence).
